NOTE 1 - GENERAL INFORMATION

Rentas Eléctricas III Limitada was formed as a limited liability company by public deed on June 6, 2006. According to public deed dated May 9, 2007, the Company acquired 100 shares owned by Transelec Holdings Rentas Limitada, corresponding to 0.01% of the share capital of Transelec S.A. (formerly Nueva Transelec S.A.), leaving the Company with 100% ownership. Thus, the merger took place by absorption, and the assets, liabilities, rights and obligations of Transelec S.A. (formerly Nueva Transelec S.A.) passed to the Company. In this way, the Company directly assumed operation of the electricity transmission business previously conducted by the aforementioned subsidiary.

On March 26, 2007, it changed its name to Rentas Eléctricas III S.A. and became a corporation and June 30, 2007, Rentas Eléctricas III S.A. changed its name to its current name, Transelec S.A. (here and after “the Company” or “Transelec”).

On May 16, 2007, the Company was listed under number 974 in the Securities Registry of the Chilean Superintendency of Securities and Insurance (SVS) and is subject to the supervision of the SVS. Simultaneously, it registered 1,000,000 shares, which corresponds to the total number of shares issued, subscribed and fully paid.

On December 1, 2014, Transelec S.A., merged with it subsidiary Transelec Norte S.A. through an acquisition of 0.01% of the shares of Transelec Norte S.A. owned by Transelec Holdings Rentas Limitada , becoming the owner of the 100% shares.

On September 1, 2015, Transelec S.A merged with its subsidiary Inversiones Electricas Transam Chile Ltda., which on August 1, 2015, had absorbed its subsidiaries: Transmisora Huepil Ltda, Transmisora Abenor Ltda y Transmisora Araucana de Electricidad Ltda. Through the acquisition of the investment complement which completes 100% of the ownership, in the merger processes mentioned above.

Results of the acquisitions mentioned above, from September 1, 2015 the consolidated financial statements of Transelec SA and subsidiaries became individual financial statements.

The Company is domiciled at Orinoco No. 90, floor 14, Las Condes, Santiago, Chile.

The Company has the exclusive objective of operating and developing electricity systems owned by the Company or by third parties designed to transport or transmit electricity and may, for these purposes, obtain, acquire and use the respective concessions and permits and exercise all of the rights and powers that current legislation confers on electric companies. Its line of business includes: commercializing the transport capacity of lines and transformation capacity of substations and equipment associated with them so that generating plants, both Chilean and foreign, may transmit the electricity they produce to their consumption centers; providing engineering or management consulting services related to the company’s line of business; and developing other business and industrial activities to use electricity transmission facilities. The Company may act directly or through subsidiaries or affiliates, both in Chile and abroad.

The Company is controlled directly by Transelec Holdings Rentas Limitada and indirectly by ETC Holdings Ltd.

The Financial Statements of the Company for the year ended December 31, 2015, were approved by the board at its meeting held on March 09, 2016, and subsequently approved by the Ordinary Shareholders' Meeting dated April 26, 2015.

These Interim Financial Statements were approved by the Board of Directors in Ordinary Meeting No.145 held on November 09, 2016.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

The principal accounting policies applied in preparing the Interim Financial Statements are detailed below. These policies have been based on IFRS in effect as of September 30, 2016 and applied uniformly for the periods presented.

2.1 Basis of preparation of the financial statements

The Interim Financial Statements at September 30, 2015, referred to above, have been prepared in accordance with the guidelines and standards of the preparation and disclosure of financial information issued by the the Superintendency of Securities and Insurance (the " SVS"), which are composed of International Financial Reporting Standards ("IFRS"), issued by the International Accounting Standards Board (IASB), following the requirements set out in International Accounting Standard (IAS) No. 34 "Interim Financial Reporting and the provisions of Circular No. 856 of October 17, 2014 instructing the regulated entities, record the effects of the differences of assets and liabilities for deferred taxes due to increased rates in the first category income tax introduced in Law No. 20,780 and specific rules of the SVS. Accordingly, these Interim Financial Statements have not been prepared in accordance with IFRS.

These Interim Financial Statements have been prepared from the accounting records maintained by the Company.

The figures in these Interim Financial Statements and their notes are expressed in thousands of Chilean pesos.

For the convenience of the reader, these Interim Financial Statements and their accompanying notes have been translated from Spanish to English.

In preparing these Interim Financial Statements, certain critical accounting estimates have been used to quantify some assets, liabilities, income and expenses. Management was also required to exercise judgment in applying Transelec's accounting policies. Areas involving a greater degree of judgment or complexity or areas in which assumptions and estimates are significant for these financial statements are described in Note 4.

The information contained in these Interim Financial Statements is the responsibility of the Company's management.

The accounting policies adopted in the preparation of the Interim Financial Statements are consistent with those applied in the preparation of the annual financial statements of the Company for the year ended December 31, 2015, except for the adoption of new standards and interpretations in effect as of January 1, 2016.

2.2 New standards and interpretations accounting

Below is a summary of new standards and amendments to IFRS that are not yet effective as of September 30, 2016:

	New Standards	Date of obligatory application
IFRS 9	Financial Instruments	January 1, 2018
IFRS 15	Revenue from Contracts with Customers	January 1, 2018
IFRS 16	Leases	January 1, 2019

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.2 New standard and interpretations accounting (continued)

IFRS 9 "Financial Instruments"

In July 2014 was issued the final version of IFRS 9 Financial Instruments, gathering all phases of the IASB project to replace IAS 39 Financial Instruments: Recognition and Measurement. This standard includes new requirements based on principles for the classification and measurement. Financial assets must be entirely classified on the basis of the business model of the entity for financial asset management and the characteristics of contractual cash flows of financial assets. Financial assets under this standard are measured either at amortized cost or fair value. Only financial assets classified as measured at amortized cost must be tested for impairment. The standard is mandatory for annual periods beginning on or after 1 January 2018. Earlier application is permitted.

The Company is evaluating the potential impact that this adoption will have on its financial statements.

IFRS 15 "Revenue from Contracts with Customers"

IFRS 15 issued in May 2014, is a new standard that is applicable to all contracts with customers except leases, financial instruments and insurance contracts. It is a joint project with the FASB to eliminate differences in the recognition of income between IFRS and U.S. GAAP. This new standard provide an improve the inconsistencies and weaknesses of IAS 18 and provide a model that will facilitate the comparability of companies from different industries and regions. Provides a new model for revenue recognition and more detailed requirements for contracts with multiple elements. It also requires more detailed disclosure. Its application is required starting on January 1, 2018 and early adoption is permitted.

The Company is evaluating the potential impact that this adoption will have on its financial statements.

IFRS 16 "Leases"

In January 2016, the IASB issued a new standard IFRS 16 Leases. IFRS 16 establishes the definition of a lease and specifies the accounting treatment of assets and liabilities arising from these contracts for both to the lessor and lessee. The new standard does not differ significantly from the current accounting standard, IAS 17 Leases regarding the accounting treatment for a lessor. However, for lessees, the new standard requires the recognition of assets and liabilities for most of the lease agreements. IFRS 16 is mandatory for annual periods beginning on or after January 1, 2019. Early application is permitted if it is applied at the same time with IFRS 15 Revenue from contracts with customers.

The Company is evaluating the potential impact that this adoption will have on its financial statements.

Enhancements and Modifications

	Enhancements and Modifications	Date of obligatory application
IAS 7	Statement of cash flows	January 1, 2017
IAS 12	Income Taxes	January 1, 2017
IFRS 2	Share Based Payment	January 1, 2018
IFRS 4	Insurance Contracts	January 1, 2018
IAS 28	Investments in associates and joint ventures	TBD
IFRS 10	Consolidated financial statements	TBD

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.2 New standard and interpretations accounting (continued)

IAS 7 "Statement of Cash Flows"

The modifications to IAS 7 "Statement of Cash Flows", issued in January 1, 2016, as part of the Disclosure Initiative project require an entity to disclose information that allows readers of the Financial Statements to assess the changes in the obligations arising from the financial activities. This includes both changes derives from cash flows and changes that are not in cash. The modification will be mandatory for annual periods commencing as of January 1, 2017. Early application is allowed.

The Company assessed the possible impact that this new standard could generate and concluded that it will not significantly affect its financial statements.

IAS 12 "Income Taxes"

These modifications, issued by the IASB in January 2016, clarify how to record deferred tax assets corresponding to debt instruments measured at fair value. The modification will be mandatory for annual periods commencing as of January 1, 2017. Early application is allowed.

The Company assessed the possible impact that this new standard could generate and concluded that it will not significantly affect its financial statements.

IFRS 2 "Share Based Payments"

In June 2016 the IASB issued amendments to IFRS 2 share-based payments, the amendments address the following areas: a) compliance conditions when share-based payments are settled in cash, b) classification of payment transactions based on shares, net of withholding income tax, c) accounting changes made to the contracts terms to modify the classification of cash-settled or equity settlement payments. It is not required to apply the amendment retrospectively, but it is allowed to adopt voluntarily to record retrospective movements. Early adoption is permitted.

The Company is evaluating the impacts that could generate such amendment.

IFRS 4 "Insurance Contracts"

The amendments address concerns related to the application of new pronouncements included in IFRS, before implementing new insurance contracts. The amendments introduce the following two options for those entities that issue insurance contracts: a) the temporary and optional exemption from the application of IFRS 9, which will be available for entities whose activities are predominantly connected with insurance. The exception will allow entities to continue to apply IAS 39 Financial Instruments, Recognition and Measurement, until 1 January 2021. b) the overlay approach, which is an option available to entities adopting IFRS 9 and issue insurance contracts, to adjust the gains or losses for certain financial assets; adjustment eliminates the volatility in valuation of financial instruments that may arise from the application of IFRS 9, allowing reclassify these effects of the profit to other comprehensive income.

The Company is evaluating the impacts that could generate such amendment.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.2 New standard and interpretations accounting (continued)

IAS 28 - "Investments in associates and joint ventures", IFRS 10 "Consolidated financial statements"

Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures (2011) address the recognition of profits or losses of sales of assets between an investor and an associate or a joint venture, which are recognized for the total when the transaction involves assets, which constitute business, will be partial. When the transaction involves a business (both when in a subsidiary or not) a gain or loss is recognized full. A gain or partial loss is recognized if the transaction involves assets that do not constitute a business, even when the assets are in a subsidiary. Earlier application is permitted. The Company assessed the possible impact that this new standard could generate and concluded that it will not significantly affect its Financial Statements.

2.3 Foreign currency translation

2.3.1 Functional and presentation currency

The Company's functional currency is the Chilean peso. These Iterim Financial Statements are presented in Chilean pesos.

2.3.2 Transactions and balances

Transactions carried out by each company in a currency other than its functional currency are recorded using the exchange rates in effect as of the date of each transaction. During the period, any differences that arise between the exchange rate recorded in accounting and the rate prevailing as of the date of collection or payment are recorded as exchange differences in the income statement. Likewise, as of each period end, balances receivable or payable in a currency other than each company's functional currency are converted using the period-end exchange rate. Losses and gains in foreign currency arising from settling these transactions and from converting monetary assets and liabilities denominated in foreign currency using period-end exchange rates are recorded in the income statement, except when they should be deferred in equity, such as the case of cash flow and net investment hedges.

Transelec has established a cash flow hedge policy for part of its revenues indexed to U.S. dollars. It also has a net investment hedge for its net investment in subsidiary Inversiones Eléctricas Transam Chile Ltda.

2.3.4 Exchange rates

As of each year end, assets and liabilities in foreign currency and UF have been converted to Chilean pesos using the following exchange rates:

Currency	**Pesos per unit**	
	September 30, 2016	**December 31, 2015**
Unidad de Fomento	26,224.30	25,629.09
US$	658.02	710.16
Euro	738.77	774.61

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.4 Segments reporting

The Company manages its operations based on one sole operating segment: transmission of electricity.

2.5 Property, plant and equipment

Property, plant and equipment are valued at acquisition cost, net of accumulated depreciation and any impairment losses it may have experienced. In addition to the price paid to acquire each item, the cost also includes, where appropriate, the following concepts:

a) All costs directly related to placing the asset in the location and condition that enables it to be used in the manner intended by management.

b) Borrowing costs incurred during the construction period that are directly attributable to the acquisition, construction or production of qualified assets, which require a substantial period of time before being ready for use are capitalized. The interest rate used is that of the specific financing or, if none exists, the average financing rate of the company carrying out the investment.

c) Future disbursements that Transelec S.A. and its subsidiary must make to close their facilities are incorporated into the value of the asset at present value, recording the corresponding provision. On an annual basis both existences of such obligations as well as estimate of future disbursements are reviewed, increasing or decreasing the value of the asset based on the results of this estimate.

Assets under construction are transferred to operating assets once the testing period has been completed when they are available for use, at which time depreciation begins.

Expansion, modernization and improvement costs that represent an increase in productivity, capacity or efficiency or an extension of useful life are capitalized as a greater cost of the corresponding assets. Replacement or overhauls of whole components that increase the asset's useful life, or its economic capacity, are recorded as an increase in value for the respective assets, derecognizing the replaced or overhauled components. Periodic maintenance, conservation and repair expenses are recorded directly in income as an expense for the period in which they are incurred.

Property, plant and equipment, net of its residual value, is depreciated by distributing the cost of its different components on a straight-line basis over its estimated useful life, which is the period during which the companies expect to use them. The useful lives and residual values of fixed assets are reviewed on a yearly basis. The land has an indefinite useful life and is not depreciated. The following table details the ranges of useful lives periods applied to principal classes of assets and used to determine depreciation expense:

	Range of estimated useful life	
	Minimum	**Maximum**
Buildings and infrastructure	20	50
Machinery and equipment	15	40
Other assets	3	15

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.6 Intangible assets

2.6.1 Goodwill

The goodwill represents the difference between the acquisition cost and the fair value of the net assets acquired in a business combination. Goodwill is not amortized; instead, at each year end and if there are indications of impairment, the Company estimates whether any impairment has reduced its recoverable value to an amount less than the carrying amount and, if appropriate, adjusts for impairment. For impairment testing purposes, goodwill acquired in a business combination is allocated from the date of acquisition to the cash generating units that are expected to benefit from this combination.

During the periods covered by those Interim Financial Statements, there were no impairment losses of goodwill.

2.6.2 Rights of way

Rights of way are presented at historical cost. These rights have no defined useful life and, therefore, are not amortized. However, these indefinite useful lives are reviewed during each reporting year to determine if they remain indefinite. These assets are tested for impairment at each year end and if there are indicator of impairment.

2.6.3 Computer software

Purchased software licenses are capitalized based on the costs incurred to purchase them and prepare them for use. These costs are amortized on a straight-line basis over their estimated useful lives that range from three to five years.

Expenses for developing or maintaining computer software are expensed when incurred. Costs directly related to creating unique, identifiable computer software controlled by the Company that is likely to generate economic benefits in excess of its costs during more than one year are recognized as intangible assets, and its amortization is included in the income statement under costs of sales.

2.7 Impairment of non-financial assets

Assets with an indefinite useful life, such as land and rights of way, are not amortized and are tested annually for impairment. Amortized assets are tested for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable.

An impairment loss is recognized for the difference between the asset’s carrying amount and its recoverable amount.

The recoverable amount is the higher of its fair value less costs to sell and its value in use this being the present value of the expected future cash flows.

Impairment losses from continuing operations are recognized in the income statement in the expenses categories in accordance with the function of the impaired assets.

Non-financial assets other than goodwill that suffered an impairment loss are reviewed at each reporting date for possible reversal of the impairment, in which case the reversal may not exceed the amount originally impaired less accumulated depreciation. Reversals are included in the income statement.

Impairment of goodwill is not reversed.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.7 Impairment of non-financial assets (continued)

Impairment testing of goodwill and intangible assets with indefinite useful lives is performed at November 30 of each year.

At September 30, there were no signs of impairment, however, there were impairment losses during the year.

2.8 Financial assets

Upon initial recognition, the Company classifies its financial assets, excluding equity method investments and investments held for sale, into four categories:

- **Trade and other receivables, including Receivables from related parties:** are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such financial assets are carried at amortized cost using the effective interest rate method.

- **Investments held to maturity:** non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company intends to hold and is capable of holding until their maturity. After initial recognition these assets are valued at its amortized cost as defined in the preceding paragraph.

- **Financial assets at fair value through profit or loss:** This includes the trading portfolio and those financial assets that have been designated as such upon initial recognition and those are managed and evaluated using fair value criteria. They are valued at its fair value in the statement of financial position, with changes in value recorded directly in income when they occur.

- **Available-for-sale investments:** These are financial assets specifically designated as available for sale or that do not fit within any of the three preceding categories and consist almost entirely of financial investments in shares/equity instruments. These investments are recorded in the statement of financial position at fair value when it can be reliably determined. In the case of interests in unlisted companies, normally the market value cannot be reliably determined and, thus, when this occurs, they are valued at acquisition cost or a lower amount if evidence of impairment exists. Changes in fair value, net of taxes, are recorded with a charge or credit to an Equity Reserve known as "Available-for-sale financial assets" until the investment is disposed of, at which time the amount accumulated in this account for that investment is fully charged to the income statement. Should the fair value be lower than the acquisition cost, if there is objective evidence that the asset has been more than temporarily impaired, the difference is recorded directly in the income statement.

Purchases and sales of financial assets are accounted for using their trade date.

A financial asset is derecognized when the rights to receive cash flows from the asset have expired.

At each reporting date, the Company assesses whether there is objective evidence that a financial asset or group of financial assets may be impaired.

A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, for example delayed payments.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.8 Financial assets (continued)

In the case of financial assets valued at amortized cost, the amount of the impairment loss is measured as the difference between the carrying amount and the present value of the future estimated cash flows. The carrying amount is reduced using a provision account and the loss is recognized in the income statement. If in a later period the amount of the expected loss increases or decreases as a consequence of an event occurred after the recognition of the impairment, the impairment loss previously recognized is increased or reduced adjusting the provision account. If the write off is later recovered, this reversal is recognized in the income statement.

In the case of financial assets classified at available-for-sale, in order to determine if the assets have been impaired, it will be considered if a significant or prolonged decrease in fair value of the assets below cost has occurred. If any such evidence exists for available-for-sale financial assets, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the income statement, is reclassified from equity and recognized in the income statement. Impairment losses recognized in the income statement for equity instruments are not reversed in the income statement.

2.9 Financial instruments and hedge activities

The Company selectively uses derivative and non-derivative instruments, to manage its exposure to exchange rate risk (See Note 15).

Derivatives are initially recognized at fair value as of the date the derivative contract is signed and are subsequently re-measured at fair value as of each year end. Any gains or losses from variations in these fair values are recognized in the statement of comprehensive income unless the derivative is designated as a hedge instrument, in which case recognition of the gain or loss depends on the nature of the hedge relationship.

The types of hedges are as follows:

- Fair value hedge.
- Cash flow hedge.
- Hedges for a net investment in a foreign entity (net investment hedge).

At the inception of the transaction, the Company documents the relationship existing between the hedge instruments and the hedged items, as well as its risk management objectives and its strategy for handling various hedge transactions. The Company also documents its assessment, both at inception and subsequently on an ongoing basis, of the effectiveness of the hedge instruments in offsetting movements in the fair values or cash flows of the hedged items.

A derivative is presented as a non-current asset or liability if its maturity is greater than 12 months and it is not expected to be realized within 12 months. Other derivatives are presented as current assets or liabilities.

2.9.1 Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, along with any change in the fair value of the hedged asset or liability that is attributable to the hedged risk.

The Company has not used fair value hedges during the years presented.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.9 Financial instruments and hedge activities (continued)

2.9.2 Cash flow hedges

Changes in the fair value of the effective portion of derivatives are recorded in equity account "Reserve for cash flow hedges". The cumulative loss or gain in this account is transferred to the income statement to the extent that the underlying item impacts the income statement because of the hedged risk, netting the effect in the same income statement account. Gains or losses from the ineffective portion of the hedge are recorded directly in the income statement. A hedge is considered highly effective when changes in the fair value or the cash flows of the underlying item directly attributable to the hedged risk are offset by changes in the fair value or the cash flows of the hedging instrument, with effectiveness ranging from 80% to 125%.

Hedge accounting is discontinued when the Company revokes the hedging relationship, the hedged item expires or is sold, terminated or exercised, or no longer qualifies for hedge accounting. Any cumulative gain or loss deferred in equity is retained and is recognized when the forecasted transaction is ultimately recognized in the income statement.

2.9.3 Net investment hedges

Hedges of net investments in foreign operations are accounted for on a similar basis to cash flow hedges. Foreign currency translation originated by a net investment in a foreign entity and derived from the hedge transaction should be registered in equity reserve (under “Other reserves” heading) until the investment's disposal. Gains or losses relating to the ineffective portion are recognized immediately in the income statement in the line item “Other gains (losses)”. Until September 1, 2015, the Company applied the net investment’s hedge in the consolidated of its subsidiary Inversiones Eléctricas Transam Chile Ltda. having U.S dollar functional currency, which was absorbed at mentioned date.

2.9.4 Derivatives not recorded as hedge accounting

Certain derivatives are not recorded as hedge accounting and are recognized as instruments in the fair value through profit or loss category. Changes in the fair value of any derivative instrument recorded like this are recognized immediately in the income statement within “Financial expense/income”.

2.9.5 Embedded derivatives

Derivatives embedded in other financial instruments or other contracts are treated as derivatives when their risks and characteristics are not closely related to the principal contracts and the principal contracts are not measured at fair value through profit and loss. In the case that they are not closely related, they are recorded separately, and any changes in value are recognized in the income statement.

In the periods presented in these Interim Financial Statements, the Company did not identify any contracts that met the conditions for embedded derivatives.

2.10 Inventory

Inventory is valued at acquisition cost using the weighted average price or net realizable value if this is lower.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.11 Cash and cash equivalents

Cash and cash equivalents presented in the statement of financial position includes cash, time deposits and other highly-liquid, short-term investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. The balance of this account does not differ from that presented in the statement of cash flows.

2.12 Paid-in capital

Paid-in capital is represented by one class of ordinary shares with one vote per share. Incremental costs directly attributable to new share issuances are presented in equity as a deduction, net of taxes, from issuance proceeds.

2.13 Financial liabilities

All financial liabilities are initially recognized at its fair value. In the case of loans they also include the direct transactions costs.

Trade and other payables are initially recognized at fair value and subsequently measured at amortized cost using the effective interest rate method.

Loans, bonds payable and financial liabilities of a similar nature are initially recognized at fair value, net of costs incurred in the transaction. Subsequently, they are valued at amortized cost and any difference between the funds obtained (net of costs to obtain them) and repayment value are recognized in the income statement over the life of the debt using the effective interest rate method.

2.14 Income tax and deferred taxes

The result for income tax for the year is determined as the sum of the current tax arising from the application of the tax rate on taxable income, after allowed deductions, plus the change in assets and liabilities for deferred tax and tax credits, both for tax losses and other deductions.

Differences between the book value and tax base of assets and liabilities generate deferred tax asset and liability balances, which are calculated using tax rates expected to be in effect when the assets and liabilities are realized.

Current taxes and changes in deferred tax assets and liabilities not from business combinations are recorded in income or in equity accounts in the statement of financial position, depending on where the gains or losses originating them were recorded.
Deferred tax assets and tax credits are recognized only when it is likely that there are future taxable profits sufficient enough against which the deductible temporary differences and the carry forward of unused tax credit can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and written off to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities are recognized for all temporary differences, except those derived from the initial recognition of goodwill and those that arose from valuing investments in subsidiaries, associates and jointly-controlled companies in which Transelec can control their reversal and where it is likely that they are not reversed in the foreseeable future.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.14 Income tax and deferred taxes (continued)

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

On October 17, 2014, the SVS issued Circular No. 856 instructing regulated entities to record the effects of the increased rates in the first category income tax on deferred assets and liabilities in equity, as introduced in Law No. 20,780. This latter changed the framework for preparation and presentation of the financial information adopted until that date as the previous framework (IFRS) required to be adopted comprehensively in an unreserved manner.

2.15 Employee benefits

2.15.1 Staff severance indemnity

The Company records liabilities for staff severance indemnity obligations based on collective and individual employment contracts, payable when their employees cease to provide services.

This benefit is recorded at nominal value.

The Company records liabilities for severance obligations personnel services for their employees, based on the provisions of the collective and individual staff contracts. If this benefit is contractual, the obligation is treated in the same way as defined benefit plans in accordance with IAS 19 and is recorded using the projected unit credit method.

Defined benefit plans define the amount of the benefit that an employee will receive upon termination of employment, which usually depends on one or more factors such as the employee's age, rotation, years of service and compensation.

The liability recognized in the statement of financial position represents the present value of the defined benefit obligation plus/minus adjustments for unrecorded actuarial gains or losses and past service costs. The present value of the defined benefit obligation is determined by discounting cash outflows estimated using as a reference BCU (rate of Chilean Central Bank bonds denominated in Unidades de Fomento) interest rates for terms similar to the maturity of the staff severance indemnity obligation.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in other comprehensive income.

2.15.2 Profit sharing

The Company recognizes a liability and an expense for profit sharing arrangements based on respective collective and individual contracts with its employees and executives, using a formula that takes into account the net income attributable to the Company's shareholders after certain adjustments. Transelec recognizes a provision when it has a contractual obligation or when a past practice has created a constructive obligation of agreement to IAS 19.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.16 Provisions

Provisions for environmental restoration, asset retirement, restructuring costs, onerous contracts, lawsuits and other contingencies are recognized when:

- The Company has a present obligation, whether legal or implicit, as a result of past events;
- It is more likely than not that an outflow of resources will be required to settle the obligation;
- The amount can be reliably estimated.

Provisions are measured at the present value of management's best estimate of the expenditures required to settle the obligation. The discount rate used to determine the present value reflects current market assessments, as of the reporting date, of the time value of money, as well as the specific risk related to the particular liability, if appropriate. Increases in provisions due to the passage of time are recognized in interest expense.

As of the date of issuance of these Interim Financial Statements, Transelec have no obligation to establish provision for environmental restoration and similar expenses.

2.17 Classification of current and non-current balances

In the statement of financial position, balances are classified based on maturity i.e., current balances mature in no more than twelve months and non-current balances in more than twelve months.

Should the Company have any obligations that mature in less than twelve months but can be refinanced over the long term at the Company's discretion, through unconditionally available credit agreements with long-term maturities, such obligations may be classified as non-current liabilities.

2.18 Revenue recognition

The regulatory framework that governs electrical transmission activity in Chile comes from the by - Law of the Electric Services dated 1982 (DFL (M) No. 1/82), and subsequent amendments thereto, including Law 19.940 (called also the "Short Law") enacted on March 13, 2004, Law 20,018 ("Short Law II"), enacted on May 19, 2005 and Law 20,257 (Generation with Non-Conventional Renewable Sources of Energy), enacted on April 1, 2008. These are complemented by the by - Law of the Electric Services Regulations dated 1997 (Supreme Decree No. 327/97 of the Mining Ministry), and its amendments, and by the Technical Standard for Liability and Quality of Service (R.M.EXTA No. 40 dated May 16, 2005) and subsequent amendments thereto.

The Company's revenues correspond mainly to remuneration from the use of its electricity transmission facilities. This remuneration is earned in part from arrangements subject to the tariff regulation and in part from contractual arrangements with the users of the transmission facilities.

The total remuneration for the use of the transmission facilities for both regulated and contractual arrangements includes in general two components: i) the AVI, which is the annuity of the Investment Value (VI), calculated in such a way that the present value of these annuities, using an annual real discount rate and the economic useful life of each of the facilities equals the cost of replacing the existing transmission facilities with new facilities with similar characteristics at current market prices, plus, ii) the COMA, which corresponds to the cost required to operate, maintain and administrate the corresponding transmission facilities.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.18 Revenue recognition (continued)

Revenues from both regulatory and contractual arrangements are recognized and invoiced on a monthly basis, using fixed monthly amounts resulting from the application of the AVI and COMA values stipulated in the contracts or resulting from the regulated tariffs and indexed as applicable. The transmission service is invoiced usually at the beginning of the month following the month when the service was rendered and thus the revenue recognized each month includes transmission service provided but not invoiced up to the month end.

2.19 Leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at the inception date, whether fulfillment of the arrangement is dependent on the use of a specific asset or assets or whether or not the arrangement conveys a right to use the asset, even if that right is not explicitly specified in an arrangement.

Leases in which substantially all risks and benefits inherent to the property are transferred to the lessee are classified as finance leases. Other leases that do not meet this criterion are classified as operating leases.

2.19.1 The Company as lessor

The assets held under a finance lease are presented in other financial assets at an amount equal to the net investment in the lease, being the aggregate of: (i) minimum lease payments receivable and (ii) any unguaranteed residual value accruing to the Company discounted at the interest rate implicit in the lease. The income (interest) is recognized on a pattern reflecting a constant periodic rate of return on the net investment in the lease, this income is presented in the statement of income in operating revenues. Lease payments relating to the period, excluding costs for any separate services, are applied against the gross investment in the lease to reduce both the principal and the unearned finance income.

Assets subject to operating leases are presented in the statement of financial position according to the nature of the asset. Lease income from operating leases is recognized in income on a straight-line basis over the lease term, unless another systematic basis is more representative to reflect time pattern in which use benefit derived from the leased asset is diminished.

2.19.2 The Company as lessee

Finance leases in which Transelec acts as lessee are recognized when the agreement begins, recording an asset based on the nature of the lease and a liability for the same amount, equal to the lesser of the fair value of the leased asset or the present value of the minimum lease payments.

Subsequently, the minimum lease payments are divided between finance expense and reducing the debt. The finance expense is recorded in the income statement and distributed over the period of the lease term so as to obtain a constant interest rate for each period over the balance of the debt pending amortization. The asset is amortized in the same terms as other similar depreciable assets, as long as there is reasonable certainty that the lessee will acquire ownership of the asset at the end of the lease. If no such certainty exists, the asset will be amortized over the lesser term between the useful life of the asset and the term of the lease.

Operating lease payments are expensed on a straight-line basis over the term of the lease unless another type of systematic basis of distribution is deemed more representative.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

2.20 Distribution of dividends

Dividends payable to the Company's shareholders are recognized as a liability in the Financial Statements in the period in which they are approved by the Company's shareholders.

Company makes a provision at the end of each year for the 30% of the profit of the year, in accordance with Law N° 18.046.

On the Company's Board meeting No. 57 held on September 30, 2010, the policy used for the determination of distributable net profit was approved. This policy does not contemplate adjustments to the profit attributable to owners of the parent.

NOTE 3 - RISK MANAGEMENT POLICY

3.1 Financial risk

Transelec is exposed to the following risks as a result of the financial instruments it holds: market risk stemming from interest rates, exchange rates and other prices that impact market values of financial instruments, credit risk and liquidity risk. The following paragraphs describe these risks and how they are managed.

3.1.1 Market risk

Market risk is defined for these purposes as the risk of changes in the fair value or future cash flows of a financial instrument as a result of changes in market prices. Market risk includes the risk of changes in interest and exchange rates, inflation rates and variations in market prices due to factors other than interest or exchange rates such as commodity prices or credit spread differentials, among others.

Company policy regulates investments and indebtedness, in an attempt to limit the impact of changes in the value of currencies and interest rates on the Company's net results by:

a) Investing cash surpluses in instruments maturing within no more than 90 days.

b) Entering into swap contracts and other instruments to maintain a balanced foreign exchange position.

c) Entering into long-term fixed rate indebtedness thus limiting risk from variable interest rates.

3.1.1.1 Interest rate risk

Significant changes in fair values and future cash flows of financial instruments that can be directly attributable to interest rate risks include changes in the net proceeds from financial instruments whose cash flows are determined in reference to floating interest rates and changes in the value of financial instruments with fixed cash flows.

The Company´s assets are primarily fixed and long-lived intangible assets. Consequently, financial liabilities that are used to finance such assets consist primarily of long-term liabilities at fixed rates. This debt is recorded in the balance sheet at amortized cost.

The objective of interest rate risk management is to achieve a balanced debt structure, decrease the impact on costs due to interest rate variations and, reduce volatility in the income statement.

NOTE 3 - RISK MANAGEMENT POLICY (CONTINUED)

3.1 Financial risk (continued)

3.1.1 Market risk (continued)

3.1.1.1 Interest rate risk (continued)

The table below compares the debts of the Company and shows that majority of the debt as of September 30, 2016 were at fixed rate. However, in the case of UF-indexed debt, variations in inflation rates could potentially impact the Company's financial expenses.

Debt	Currency or index	Interest Rate	Type of rate	Amount in Original Currency (thousand)	
				September 30, 2016	December 31, 2015
Bono Series C	UF	3.50%	Fixed	-	6,000
Bono Series D	UF	4.25%	Fixed	13,500	13,500
Bono Series H	UF	4.80%	Fixed	3,000	3,000
Bono Series K	UF	4.60%	Fixed	1,600	1,600
Bono Series M	UF	4.05%	Fixed	3,400	3,400
Bono Series N	UF	3.95%	Fixed	3,000	3,000
Bono Series Q	UF	3.95%	Fixed	3,100	3,100
Senior Notes	USD	4.625%	Fixed	300,000	300,000
Senior Notes	USD	4.250%	Fixed	375,000	375,000
Senior Notes	USD	3,875%	Fixed	350,000	-
Revolving Credit Facility	USD	2,10%	Floating (*)	-	-
Local Note	CLP	3.80%	Fixed	-	16,000,000

(*) The floating rate of the Revolving credit facility breaks down in 3M LIBOR plus a margin of 2.10%. At September 30, 2016, the Company did not utilize this line therefore does not pay interest of 2.10% and currently is paying a fixed commission of 0.4375% per annum of the committed amount undrawn.

Even if an increase in inflation rates could impact the costs of debt denominated in UF, and therefore the Company's finance expenses, these impacts are partly mitigated by accounts receivable denominated in UF. The following shows the effects of UF-indexed debt on the company's financial result.

Serie	Position Long/ (Short)	Effect annual on income (ThCh$) Inflation (3%)	Inflation (4%)	Inflation (2%)
Bono D	(13,362,696)	(16,021)	(19,525)	(12,517)

Bono K	(1,598,591)	(1,917)	(2,336)	(1,497)
Bono M	(1,464,874)	(1,756)	(2,140)	(1,372)
Bono M1	(1,851,319)	(2,219)	(2,705)	(1,734)
Bono N	(2,857,835)	(3,426)	(4,175)	(2,677)
Bono Q	(3,070,885)	(3,682)	(4,487)	(2,877)
Total	**(27,207,255)**	**(32,619)**	**(39,753)**	**(25,485)**

NOTE 3 - RISK MANAGEMENT POLICY (CONTINUED)

3.1 Financial risk (continued)

3.1.1 Market risk (continued)

3.1.1.2 Exchange rate risk

Transelec's exposure to the risk of exchange rate variations is due to the following:

- Transelec carries out several types of transactions in U.S. dollars (certain construction contracts, import purchases, etc.).
  Maintains accounts receivables in US dollars.
- Transelec maintains Cross Currency Swap contracts, which offset exchange rate risks of international emissions made in 2014 and 2016, for notional amounts equivalent to USD 375.000.000 and USD 350.000.000, respectively (Long-term position).
- Maintains lease contracts that generate income indexed to US dollars.

Exchange rate exposure is managed using an approved policy that involves:

a) Fully hedging net balance sheet exposure using diverse instruments such as foreign exchange forward contracts and cross currency swaps.

The following table details the amounts of monetary assets and liabilities denominated into dollar and Chilean pesos in the periods indicated below:

	Liabilities		Assets	
	September 30, 2016 MCh$	December 31, 2015 MCh$	September 30, 2016 MCh$	December 31, 2015 MCh$
U.S. dollar (amounts associated with balance sheet items)	646,400	482,980	646,007	499,757
U.S. dollar (amounts associated with income statement items)	-	-	-	-
Chilean peso	1,654,687	1,728,400	1,655,080	1,711,623

b) Polynomials indexing of the Company´s revenues contain formulas for setting these revenues in the short term, differ from the long-term indexing. In order that the short-term indexing is consistent with long-term indexing, the Company, periodically (every six months) sell a percentage of their semi-annual fixed dollar income using currency forwards. These forwards are considered as cash flow hedges and therefore changes in fair value, while not realized are included in other comprehensive income.

NOTE 3 - RISK MANAGEMENT POLICY (CONTINUED)

3.1 Financial risk (continued)

3.1.1 Market risk (continued)

3.1.1.2 Exchange rate risk (continued)

3.1.1.2.1 Sensitivity analysis

The following chart shows the sensitivity analysis of various items to a 10% increase or decrease in exchange rates (US Dollar) and their effect on income or equity. This exchange rate sensitivity (10%) is used to internally report the Company's foreign exchange risk to key management personnel and represents management's valuation of the possible change in US Dollar exchange rate. The sensitivity analysis includes asset and liability balances in currencies other than the Company's functional currency. A positive number indicates an increase in income or other comprehensive income when the Chilean peso is strengthened with respect to the foreign currency. A negative percentage implies a weakening of the Chilean peso with respect to the foreign currency, which negatively impacts the income statement or in other comprehensive income.

In addition, the sensitivity table below shows the risk faced by the company with regard to the variation of the Unidad de Fomento (UF); this effect is recognized in income.

Item (Currency)	Position MCh$ Long /(Short)	Net income (gain)/loss MCh$ Change (-10%)	Net income (gain)/loss MCh$ Change (+10%)	Position MCh$ Long /(Short)	OCI (gain)/loss MCh$ Change (-10%)	OCI (gain)/loss MCh$ Change (+10%)
Cash (US$)	2,522	(4)	4	-	-	-
Leasing (US$)	12,502	(21)	21	-	-	-
Senior Notes (US$)	(643,527)	1,087	(1,087)	-	-	-
Financial instrument swap	443,692	(749)	749	(421,406)	712	(712)
Intercompany loan (US$)	187,283	(316)	316	-	-	-
Other (US$)	(2,854)	5	(5)	-	-	-
Total	(382)	2	(2)	(421,406)	712	(712)

3.1.2 Credit risk

With respect to credit risk related to accounts receivable from the electricity transmission activity, this risk is historically very low in the industry given the nature of business of the Company's customers and the short-term period of collection of receivables from clients leads to the situation in which they do not accumulate very significant amounts.

NOTE 3 - RISK MANAGEMENT POLICY (CONTINUED)

3.1 Financial risk (continued)

3.1.2 Credit risk (continued)

However, revenues are highly concentrated in major customers as shown in the following table:

Revenues	For the nine - month ended September 30, 2016 ThCh$	For the nine-month ended September 30, 2015 ThCh$
Endesa Group	100,228,679	91,549,364
Colbún Group	35,957,316	32,586,416
AES Gener Group	36,052,266	40,556,626
E-CL Group	10,044,499	-
Pacific Hydro-LH-LC Group	6,735,748	5,060,312
Others	25,587,021	35,079,787
Total	**214,605,529**	**204,832,505**
% of concentration of 5 top customers	**88.08%**	**82.87%**

Tolls and tariff revenues that these companies must pay to use the transmission system will generate significant future cash flows of Transelec and a substantial change in their assets, financial conditions and / or results of operations could adversely affect the Company.

Regarding the credit risks associated with financial assets of the Company other than accounts receivable (time deposits, mutual funds, bonds, covenants, active position derivative), the policy of the Treasury establishes limits on exposure to a particular institution, this limit depends on the risk classification and capital of each institution. Additionally, in the case of investments in mutual funds, only the ones having risk classification qualify.

3.1.3 Liquidity risk

a) Risk associated to Company's management

Liquidity risk is the risk of the Company not satisfying a need for cash or debt payment upon maturity. Liquidity risk also includes the risk of not being able to liquidate assets in a timely manner at a reasonable price.

To guarantee that it is able to respond financially both the investment opportunities and to the timely payment of its obligations, Transelec separately records its available cash and short-term accounts receivable with a dedicated revolving credit for working capital in the amount of US$ 250 million equivalent to Ch$164.505 billion. This committed line of credit was contracted on July 9, 2012, is granted for a period of three years by a bank syndicate consisting of Scotiabank, Bank of Tokyo-Mitsubishi and DnB NOR. Additionally this line was renegotiated and extended on October 15, 2014 until October 15, 2017, with a bank syndicate formed by the following banks: Scotiabank, Bank of Tokyo-Mitsubishi, DnB NOR, Citibank, JP Morgan Chase Bank and Export Development Canada. Upon renewal the improved following conditions were agreed upon: (i) commissions payable on committed unused amounts (Commitment Fee) from 0.6% to 0.4375%, (ii) the margin or spread over used amounts from 2.35% to 1.25% and (iii) other restrictions clauses more favorable to Transelec.

The Company is exposed to risks associated with indebtedness, including refinancing risk when its debt matures.

These risks are mitigated by using long-term debt and appropriately structuring maturities over time.

NOTE 3 - RISK MANAGEMENT POLICY (CONTINUED)

3.1 Financial risk (continued)

3.1.3 Liquidity risk (continued)

a) Risk associated to Company's management (continued)

The following table presents the capital amortizations and estimated interest payments corresponding to the Company's financial liabilities (debt), according to their maturity date, as of September 30, 2016 and December 31, 2015.

Debt maturity	Less than 1 Years	1 to 3 Years	3 to 5 Years	5 to 10 Years	More than 10 years	Total
September 30, 2016	58,904,590	117,809,180	117,809,180	695,565,577	1,139,337,780	2,129,426,307
December 31, 2015	226,264,902	101,690,945	101,690,945	708,219,336	884,187,142	2,022,053,270

The maturity of derivatives is presented Note 15.3.

b) Associated risk to the settlement of trunk transmission system tariff revenues

According to Decree N°4/20,018 from the Ministry of Economy, Fomentation and Reconstruction, in its articles 81, 101, 104 and 106, and complementary rules, Transelec has the right to perceive on a provisory basis the real tariff income (IT for its name in Spanish) of the trunk transmission system generated for every period.

In order to get their own revenues set up in the first paragraph of article N°101 of the above mentioned Decree N°4/20.018, the real tariff income perceived on a provisory basis must be settled by Transelec according to the repayment schedule prepared by the respective CDEC (Center of Economic Dispatch of Charge) through the collection or payment to the different companies, owners of generation facilities.

Transelec could face the risk of not timely collecting the IT that some of the companies owners of generation facilities should pay as determined in the energy balances prepared by CDEC, what may temporarily affect the Company's liquidity position. In this sense, and in the opinion of the Company, the "clearing house" function that Transelec fulfils in the above-mentioned collection process, consists not of the collection of amounts for its own benefit, but it is merely collection and subsequent transfers to third parties of credits and debts that belong to the generating companies, with the exception of the expected IT.

NOTE 4 - CRITICAL ESTIMATES, JUDGMENTS OR CRITERIA EMPLOYED BY MANAGEMENT

The estimates and criteria used by the Company are continually evaluated and are based on historical experience and other factors, including expectations of future events that are considered reasonable based on the circumstances.

NOTE 4 - CRITICAL ESTIMATES, JUDGMENTS OR CRITERIA EMPLOYED BY MANAGEMENT (CONTINUED)

The Company makes estimates and assumptions about the future. By definition, the resulting accounting estimates will rarely be equal to the real outcomes. Estimates and assumptions with a significant risk of causing a important risk to the Company during the upcoming year are detailed below:

- The estimates of recoverable values of assets and goodwill to determine potential existence of impairment losses;
- Useful lives of property, plant and equipment and intangible assets;
- The assumptions used to calculate the fair value of financial instruments;
- The actuarial assumptions used to calculate obligations with employees;
- Future tax results for the purposes of determining the recoverability of deferred tax assets.
- Determination of existence and classification of financial or operating leases based on the transfer of risks and rewards of the leased assets.

NOTE 5 - CASH AND CASH EQUIVALENTS

a) As of September 30, 2016 and December 31, 2015, this account is detailed as follows:

Cash and Cash Equivalents	Balance as of September 30, 2016 ThCh$	Balance as of December 31, 2015 ThCh$
Bank and cash balances	2,635,943	21,173,289
Short-term deposits	2,112,124	2,983,318
Reverse repurchase agreements and mutual funds	33,183,932	-
Total	**37,931,999**	**24,156,607**

Cash and cash equivalents included in the statement of financial position as of September 30, 2016 and December 31, 2015 does not differ from those presented in the statement of cash flows.

b) The following table details the balance of cash and cash equivalents by type of currency:

Detail of Cash and Cash Equivalents	Currency	Balance as of September 30, 2016 ThCh$	Balance as of December 31, 2015 ThCh$
Amount of cash and cash equivalents	U.S. dollars	2,514,528	23,776,117
Amount of cash and cash equivalents	Euros	8,396	30,968
Amount of cash and cash equivalents	Chilean pesos	35,409,075	349,522
Total		**37,931,999**	**24,156,607**

Fair values are not significantly different from book values due to the short maturity of these instruments. There is no restriction on these instruments.

NOTE 6 - TRADE AND OTHER RECEIVABLES

As of September 30, 2016 and December 31, 2015, this account is detailed as follows:

Item	Balance as of September 30, 2016 ThCh$	Balance as of December 31, 2015 ThCh$
Trade receivables	48,128,231	51,053,016
Miscellaneous receivables	349,109	214,251
Total trade and other receivables	**48,477,340**	**51,267,267**
Provision for uncollectible amount (*)	(1,392,383)	(1,392,383)
Total trade and other receivables (net)	**47,084,957**	**49,874,884**

Refer to Note 7 for the amounts, terms and conditions of receivables from related parties. As of September 30, 2016 and December 31, 2015, the aging of trade and other receivables is as follows:

	Balance as of September 30, 2016 ThCh$	Balance as of December 31, 2015 ThCh$
Maturing in less than 30 days	28,076,939	26,972,371
Maturing in more than 30 days up to 1 year	19,008,018	22,902,513
Total	**47,084,957**	**49,874,884**

The fair values are not significantly different from book values due to the short maturity of these instruments.

(*) On September 13, 2011 the company Campanario Generación S.A. was declared bankrupt and stopped paying Transelec from tolls and tariff revenue for ThCh$6,345,762 (September 30, 2011). Based on the legal and regulatory history, the Company estimated that there are no indications to attest that the accounts receivable outstanding from tariff revenues, are impaired. Therefore, Transelec S.A. recorded a provision for uncollectible amount as of December 31, 2015 for ThCh$ 1,392,383 relating to accounts receivable for items other than tariff revenues for which - at the date of the presentation of these financial statements - there is no certainty that the Company will recover.

The movement of the provision for uncollectible amount is presented the period ended September 30, 2016 and December 31, 2015:

	ThCh$
Balance as of January 1, 2015	1,392,383
Increase charged to the current period	-
Decrease due to utilization	-
Decrease due to reversals and receivables	-
Balance as of December 31, 2015	**1,392,383**
Increase charged to the current period	-
Decrease due to utilization	-
Decrease due to reversals and receivables	-
Balance as of September 30, 2016	**1,392,383**

NOTE 7 - BALANCES AND TRANSACTIONS WITH RELATED PARTIES

7.1 Balances and transactions with related parties

Transactions between the Company and its subsidiaries consist of customary transactions in terms of their objective and conditions. These transactions have been eliminated in the consolidation process and are not presented in this Note.

Balances of receivables and payables between the company and its unconsolidated related companies are detailed as follows:

Receivables from related parties

							Balance as of			
							Current		Non-current	
Tax ID Number	Company	Country	Description	Maturity	Relation	Currency	September 30, 2016 ThCh$	December 31, 2015 ThCh$	September 30, 2016 ThCh$	December 31, 2015 ThCh$

76.560.200-9	Transelec Holdings Rentas Ltda.	Chile	Direct parent	Exchange rate	14,772,747	(14,772,747)	26,021,959	26,021,959
76.560.200-9	Transelec Holdings Rentas Ltda.	Chile	Direct parent	UF Readjustment	134,561	134,561	1,087,544	1,087,544

These operations are in accordance with the provisions of Articles No. 44 and 49 of Law No. 18,046, on Corporations.

NOTE 7 - BALANCES AND TRANSACTIONS WITH RELATED PARTIES (CONTINUED)

7.2 Board of Directors and management

In accordance with the Company's by-laws, the Board of Directors is composed of nine members appointed by shareholders at the respective shareholders' meeting. They hold their positions for two years and may be re-elected. For each Board Member there is an alternate Board Member. The current Board of Directors was elected in the Ordinary General Shareholders' Meeting on April 26, 2016. The current Chairman of the Board was elected at the Board meeting dated May 18, 2016.

7.2.1 Board of Directors' compensation

As established in Article No. 33 of Law No. 18,046 on Anonymous Societies, on the Eighth Ordinary Shareholders' Meeting of Transelec S.A., held on April 26, 2016, shareholders established annual gross compensation for the Company's Directors of the equivalent of US$ 90,000, regardless of the number of sessions actually attended or held and that the alternate directors do not receive remuneration. Allowances are paid on a quarterly basis.

Directors Richard Legault, Alfredo Ergas, Paul Dufresne, Patrick Charbonneau and Brenda Eaton, and also all alternate directors waived their respective allowances. Accordingly, the following compensation was received by directors during the periods 2016 and 2015:

	September 30, 2016 ThCh$	September 30, 2015 ThCh$
Blas Tomic Errázuriz	41,337	41,128
José Ramón Valente Vias	41,337	41,128
Alejandro Jadresic Marinovic	41,337	41,128
Mario Alejandro Valcarce Duran	41,337	41,128
Bruno Pedro Philippi Irarrazabal	41,337	41,128

7.3 Board expenses

During the period 2016 and 2015 there have been no expenses related to consulting for the Board.

7.4 Audit committee

In April 2007, the Company approved creation of an Audit Committee, separate from that established in the Corporations Law. Its functions include, among others, reviewing the reports of the external auditors as well as the Company's balance sheets, other Financial Statements and internal systems. Transelec's Audit Committee is composed of four Directors, all of whom are qualified in financial matters and apply their specialized knowledge to diverse topics of interest to the Company. Committee members are appointed by the Board of Directors.

They hold their positions for two years and may be re-elected. The Committee appoints a Chairman-from among its members-and a Secretary, who may be one of its members or the Secretary of the Board of Directors. The Audit Committee held two meetings both during the period 2016 and 2015.

As of March 9, 2016, the Audit Committee members were composed by its president Mario Valcarce, Directors Mr. Alfredo Ergas, Mrs. Brenda Eaton and Mr. José Ramón Valente, besides the Secretary, Mr. Arthur Le Blanc Cerda.

NOTE 7 - BALANCES AND TRANSACTIONS WITH RELATED PARTIES (CONTINUED)

7.4 Audit committee (continued)

On the Ordinary Shareholders' Meeting of Transelec S.A., held on April 26, 2016, shareholders established annual gross compensation for the Committee members at US$ 10,000, regardless of the number of sessions actually attended or held.

The following compensation was received by members of the Audit Committee during 2016 and 2015:

	September 30, 2016 ThCh$	September 30, 2015 ThCh$
José Ramón Valente	6,391	6,068
Mario Alejandro Valcarce Duran	6,391	6,068

7.5 Compensation of key management that are not Directors

Members of Key Management

Andrés Kuhlmann Jahn	Chief Executive Officer
Eric Ahumada Gómez	Vice-President of Business Development
Francisco Castro Crichton	Vice-President of Finance
Alexandros Semertzakis Pandolfi	Vice-President of Engineering and Construction
Claudio Aravena Vallejo	Vice-President of Human Resources
Arturo Le Blanc Cerda	Vice-President of Legal Matters
Rodrigo Lopéz Vergara	Vice-President of Operations
David Noe Scheinwald	Vice-President of Electrical Development

The Company has established an incentive plan for its executives based on meeting certain individual goals that contribute to the Company's results. These incentives are structured as a minimum and maximum number of gross monthly salaries and paid once per year.

Compensation of key management personnel by concept for the periods 2016 and 2015 is detailed as follows:

	September 30, 2016 ThCh$	September 30, 2015 ThCh$
Salaries	1,284,961	1,128,338
Short-term employee benefits	1,094,040	473,712
Long-term employee benefits	465,589	187,595
Total compensation received by key management personnel	**2,844,590**	**1,789,645**

NOTE 8 - INVENTORY

As of September 30, 2016 and December 31, 2015, this account is detailed as follows:

Classes of inventory	Balance as of September 30, 2016 ThCh$	Balance as of December 31, 2015 ThCh$
Safety equipment	11,402	33,854
Total	**11,402**	**33,854**

NOTE 9 - OTHER FINANCIAL ASSETS, LEASES

As of September 30, 2016 and December 31, 2015, this account is detailed as follows:

	September 30, 2016 ThCh$	December 31, 2015 ThCh$
Finance lease receivables current	757,063	802,284
Sub-total Other financial assets current	**757,063**	**802,284**
Finance lease receivables non-current	11,744,553	13,391,570
Swap	22,286,434	36,698,535
Other financial assets	279,199	278,848
Sub-total Other financial assets non-current	**34,310,186**	**50,368,953**
Total	**35,067,249**	**51,171,237**

9.1 Finance lease receivables

Within current and non-current other assets receivable, the Company includes assets that have been constructed at the express request of the lessee. Therefore, substantially all risks and benefits have been transferred when the assets are commissioned. Nominal value (gross investment in the lease) and present value of the minimum lease payments to be received are presented in the following tables:

September 30, 2016			
Period in Years	**Present Value (net investment) ThCh$**	**Interest receivable ThCh$**	**Nominal value (gross investment) ThCh$**
Less than 1	757,063	572,532	1,329,595
1-5	4,290,844	2,357,130	6,647,974
Over 5	7,453,709	2,308,627	9,762,336
Total	12,501,616	5,238,289	17,739,905

NOTE 9 - OTHER FINANCIAL ASSETS, LEASES (CONTINUED)

9.1 Finance lease receivables (continued)

December 31, 2015			
Period in years	Present Value (net investment) ThCh$	Interest receivable ThCh$	Nominal value (gross investment) ThCh$
Less than 1	802.284	641,132	1,443,416
1-5	4,519,229	2,697,849	7,217,078
Over 5	8,872,341	2,785,325	11,657,666
Total	**14,193,854**	**6,124,306**	**20,318,160**

Movements in finance leases:

	Balance as of	
	September 30, 2016 ThCh$	December 31, 2015 ThCh$
Opening balance	**14,193,854**	**12,996,779**
Amortization	(672,998)	(745,245)
Translation difference	(1,019,240)	1,942,320
Ending balance	**12,501,616**	**14,193,854**

The amortization for the nine-month period ended September 30, 2016, was ThCh$472,076.

9.2 Operating leases payable

The Company has operating leases contract in which it acts as lessee. Payments under those contracts are recognized in administrative expenses as follows:

	September 30, 2016 ThCh$	September 30, 2015 ThCh$
Real estate lease	797,221	741,772
Other leases	650,834	535,910
Total operating leases	**1,448,055**	**1,277,682**

NOTE 9 - OTHER FINANCIAL ASSETS, LEASES (CONTINUED)

9.2 Operating leases payable (continued)

The following table details the amounts payable based on the maturity of each agreement.

	Up to 1 year ThCh$	1 to 5 years ThCh$	More than 5 Years ThCh$
Real estate lease	1,062,961	4,251,844	-
Other leases	867,779	3,471,116	-
Total operating leases	1,930,740	7,722,960	-

NOTE 10 - INTANGIBLE ASSETS

The following tables detail the balances within this account as of September 30, 2016 and December 31, 2015:

Intangible assets, net	**September 30, 2016 ThCh$**	**December 31, 2015 ThCh$**
Rights of way (*)	174,052,419	174,170,622

NOTE 11 - PROPERTY, PLANT AND EQUIPMENT (CONTINUED)

11.3 Additional information on property, plant and equipment

Transelec has insurance policies to cover possible risks subject to various items of property, plant and equipment and possible claims that might be filed by exercising its activities, understanding that such policies cover sufficiently the risks to which they are taken.

The Company held as of September 30, 2016 and December 31, 2015 commitments to purchase items of property, plant and equipment arising from construction contracts under EPC (Engeenering-Procurment-Construction) in the amount of ThCh$ 178,656,821 and ThCh$ 86,784,307, respectively.

The following table details capitalized interest costs in property, plant and equipment:

	September 30, 2016	September 30, 2015
Capitalization rate (Annual basis)	6.49%	7.75%
Capitalized interest costs (ThCh$)	2,138,736	2,991,785

Work in progress balances amounts to ThCh$ 87,927,701 and ThCh$ 72,801,826 as of September 30, 2016 and December 31, 2015 respectively.

NOTE 12 - DEFERRED TAXES

12.1 Detail of deferred tax assets and liabilities

The origin of the deferred taxes recorded as of September 30, 2016 and December 31, 2015, is detailed as follows:

Temporary differences	Net deferred taxes	
	September 30, 2016 ThCh$	December 31, 2015 ThCh$
Depreciable fixed assets	(95,050,140)	(70,430,126)
Financial expenses	(835,962)	(1,021,760)
Leased assets	(787,868)	(1,198,091)
Materials and spare parts	(16,789)	(152,846)
Tax losses	53,594,378	51,378,939
Staff severance indemnities provision	16,644	131,967
Deferred income	1,792,704	1,873,212
Investment value provision	12,955	12,955
Lawsuit provision	-	27,945
Obsolescence provision	302,822	311,411
Work in progress	1,141,456	1,049,221
Vacation provisions	401,982	443,526
Intangible assets	(7,772,960)	(8,641,523)
Adjustment of effective interest rate of bonds	(3,244,023)	(2,798,382)
Land	1,240,405	1,072,888
Allowance for doubtful receivables	375,943	375,943
Net deferred tax assets/(liabilities)	**(48,828,453)**	**(27,564,721)**

NOTE 12 - DEFERRED TAXES (CONTINUED)

12.1 Detail of deferred tax assets and liabilities (continued)

Temporary differences	Net deferred taxes	
	September 30, 2016 ThCh$	December 31, 2015 ThCh$
Reflected in the statement financial position as follows:		
Deferred tax assets	-	-
Deferred tax liabilities	(48,828,453)	(27,564,721)
Net deferred tax assets/(liabilities)	**(48,828,453)**	**(27,564,721)**

12.2 Deferred tax movements in statement of financial position

The movements of balances of deferred taxes in the consolidated statement of financial position for the periods September 30, 2016 and December 31, 2015 are as follows:

Deferred tax movements	Asset ThCh$	Liability ThCh$
Balance as of January 1, 2015	**102.334**	**14,270,024**
Increase (decrease)	(102.334)	12,350,786
Translation adjustment	-	943,911
Balance as of December 31, 2015	**-**	**27.564.721**
Increase (decrease)	-	21,263,732
Balance as of September 30, 2016	**-**	**48,828,453**

Recovery of deferred tax assets will depend on whether sufficient tax profits are obtained in the future. Based on its projections the Company believes that its future profits will allow these assets to be recovered.

NOTE 13 - FINANCIAL LIABILITIES

13.1 Other financial liabilities

The current and non-current portion of this account as of September 30, 2016 and December 31, 2015 is as follows:

Interest bearing loans	September 30, 2016		December 31, 2015	
	Current ThCh$	Non- current ThCh$	Current ThCh$	Non- current ThCh$

NOTE 13 - FINANCIAL LIABILITIES (CONTINUED)

13.3 Other aspects

As of September 30, 2016 and December 31, 2015, Transelec had available a credit line of US$250 million which at the date was not used by the company.

Many of the Company's debt agreements include an obligation to comply with certain covenants, including certain financial ratios (see Note 19), which is customary for agreements of this nature. This also includes affirmative and negative obligations that require these commitments to be monitored.

NOTE 14 - TRADE AND OTHER PAYABLES

Trade and other payables as of September 30, 2016 and December 31, 2015, are detailed as follows:

	Current		Non- current	
Trade and other payables	**September 30, 2016 ThCh$**	**December 31, 2015 ThCh$**	**September 30, 2016 ThCh$**	**December 31, 2015 ThCh$**
Trade and other payables	40,346,571	49,926,412	-	-
Other accounts payable	590,238	654,697		
Total	**40,936,809**	**50,581,109**	**-**	**-**

The average payment period for suppliers in the periods ended 2016 and 2015 was 30 days and, therefore, the fair value of these liabilities does not differ significantly from their book value.

NOTE 15 - DERIVATIVE INSTRUMENTS

In adhering to its risk management policy, Transelec enters primarily into exchange rate derivatives (see Note 3). The Company classifies its derivatives as:

- Cash flow hedging instruments: Those that hedge the cash flows of the hedged underlying item,

In addition, the Company uses certain non-hedging derivatives: the instruments that do not meet the requirements of IFRS and thus do not qualify for hedge accounting.

15.1 Hedge assets and liabilities

	September 30, 2016				December 31, 2015			
	Asset		Liability		Asset		Liability	
	Current ThCh$	Non – current ThCh$	Current ThCh$	Non - current ThCh$	Current ThCh$	Non - current ThCh$	Current ThCh$	Non – current ThCh$
Currency hedge Swap	-	22,286,434	1,885,440	-	-	36,698,535	2,012,588	-
Total	**-**	**22,286,434**	**1,885,440**	**-**	**-**	**36,698,535**	**2,012,588**	**-**

NOTE 15 - DERIVATIVE INSTRUMENTS (CONTINUED)

15.2 Other Information

The following table details Transelec's derivatives as of September 30, 2016 and December 31, 2015, including their fair values as well as their notional and contractual values by maturity:

Financial derivatives	Fair value ThCh$	Before 1 year ThCh$	Maturity 2017 ThCh$	2018 ThCh$	2019 ThCh$	2020 ThCh$	Subsequent years ThCh$	September 30, 2016 Total ThCh$
Currency hedge Swap	20,400,894	(1,885,540)					22,286,434	20,400,894

Financial derivatives	Fair value ThCh$	Before 1 year ThCh$	Maturity 2017 ThCh$	2018 ThCh$	2019 ThCh$	2020 ThCh$	Subsequent years ThCh$	December 31, 2015 Total ThCh$
Currency hedge Swap	34,685,947	(2,012,588)					36,698,535	34,685,947

The contractual notional amount of these contracts does not represent the risk assumed by Transelec as it is only in response to the basis with which derivative settlements are calculated. In the periods presented September 30, 2016 and December 31, 2015, Transelec had not recognized any gains or losses for ineffectiveness of cash flow hedges.

Derivatives are valued considering valuation techniques which include observable data, the most commonly used valuation techniques include swap valuation models using present value calculations. The models include several inputs including the credit risk of the counterparty, foreign exchange spot rates and interest rate curves.

15.3 Fair value hierarchies

Financial instruments recognized at fair value in the statement of financial position are classified based on the following hierarchies: (a) Level 1: Quoted (unadjusted) price in an active market for identical assets and liabilities, (b) Level 2: Inputs other than quoted prices included in Level 1 that are observable for assets or liabilities, either directly (i,e,, as a price) or indirectly (i.e., as a derivative of a price); and (c) Level 3: Inputs for assets or liabilities that are not based on observable market information (non-observable inputs).

The following table details financial assets and liabilities measured at fair value as of June 30, 2016.

Financial instrumental measured at fair value	September 30, 2015	Fair value measured at the end of the reporting period using Level 1 ThCh	Level 2 ThCh$	Level 3 ThCh$

Other provisions	205,477	-	-	-
Total	**6,761,681**	**538,837**	**353,872**	**3,506,146**

Severance pay for years of service

The Company has constituted a provision to cover the obligation of severance pay for years of service, to be paid to its employees, in accordance with the collective contracts signed with the latter. This provision represents the entire accrued provision (see note 18).

Vacation accrual

This obligation corresponds to the expense for vacations granted and not accrued by the Company's employees, whose benefit is specified in individual contract of each employee.

Annual benefits

This provision primarily includes allowances for employee participation in the Company's income, which are mostly paid within the first quarter of the following year.

Other provisions

This category's balance primarily corresponds to the obligation for health agreement contributions.

NOTE 17 - PROVISIONS (CONTINUED)

17.3 Lawsuits and arbitration proceedings

Transelec S.A.

1. Regarding the delay in commissioning the Rodeo-Chena project, and in accordance with the bidding terms and conditions, which stipulate a fine of US$30,000 per day of delay with a maximum of 60 days, the Company paid the fine amounting to US$ 1,800,000. At the date of the financials, there is pending a third guarantees for US $ 313.500.-, which was paid to the Ministry of Energy in July 2016.

   With regard to delays in two of the important milestones of Nogales-Polpaico project, the Ministry of Energy proceeded in June 2016 to collect two guarantees for a total of US $ 2.960.000. In September, the CDEC-SIC settled the fine for delays to start the operations of the Project and reported that Transelec was obliged to pay the maximum fine, that is, US$1,800,000. Transelec filed an appeal for protection against the CDEC-SIC and the Ministry of Energy, since there are requests for extension of time they have not been resolved by the Ministry, so it is entirely inappropriate to act CDEC-SIC and the failure of the Ministry of Energy. The Court of Appeals declared admissible and ordered injunction.

   As of September 30, 2016 the Company has established a provision for these and other contingents liabilities totaling to ThCh$356,052 considering for the purpose of this estimate that there are similar cases in the Court of Appeals in which the Court of Appeals rejected the claim, pending the hearing of the appeal before Supreme Court, that in such cases has confirmed the decisions of the SEC. In addition, there are cases with appeals before the SEC and for which the body normally and to some extent has kept the fine charged.

2. As of September 30, 2016, the company Campanario Generación S,A, has not fulfilled its obligation to pay invoices issued by Transelec for the injection and withdrawal balances issued by the CDEC-SIC in September, July, August and September 2011. On August 3, 2011, Transelec notified the SEC of this company's failure to comply with its obligation so it could adopt legally appropriate measures.

   In order to collect the funds owed by Campanario Generación S.A., on August 12, 2011, Transelec S.A. filed a preparatory invoice notification measure against that company before the 5th Civil Court of Santiago for unpaid invoices totaling ThCh$ 6,285,171, This judicial management was presented to the 5th Civil Court of Santiago.

   On September 13, 2011, Campanario Generación S.A. was declared bankrupt by the 6th Civil Court of Santiago, In this bankruptcy proceeding, Transelec claimed $ 14,688,235,160, which includes VAT of ThCh$ 2,345,064, plus principal, interest, indexation adjustments and costs.

   By Exempt Resolution No, 2288 dated August 26, 2011, the SEC ordered the CDEC-SIC to exclude the Company from the Balance of Energy and Power which is made to calculate tariff revenues (IT). In compliance with the order, CDEC-SIC issued a new procedure, which was approved by the National Energy Commission (CNE), Transelec S,A, impugned the proceedings before the Panel of Experts, which in Opinion No, 24-2011 ordered the issuance of a new procedure by the CDEC-SIC that still requires an approval by the CNE.

   In relation with the final tolls and IT for 2011, the CDEC-SIC issued the corresponding settlement, which was also impugned by Transelec before the Panel of Experts, which through Opinion No, 2-2012 ordered CDEC-SIC to determine new settlements of tolls and final IT for 2011, declaring that Transelec S,A, is not responsible for the payments of amounts owed by Campanario Generación S.A. to generators, and also that they must pay the IT related to Campanario Generación S,A, to Transelec S.A. This new settlement issued was objected by Endesa through discrepancy filed with the Panel of Experts, which to date did not issue a final resolution. The distribution of the amount already recovered by Transelec in bankruptcy proceeding (ThCh$ 8,012,745) depends on the final settlement mechanism.

NOTE 17 - PROVISIONS (CONTINUED)

17.3 Lawsuits and arbitration proceedings (continued)

Transelec S.A. (continued)

2. (Continued)

In the bankruptcy proceedings the assets of Campanario Generación S.A. were liquidated and an amount of US$ 86.6 million was recovered. According to the opinion of our external lawyers (Philippi), those proceeds will be sufficient to cover approximately 40.86% of the verified debt of Campanario Generación S.A. This percentage may vary depending on the price obtained from the sale of water rights, In addition, efforts are being made to recover an amount paid in respect of VAT and related relating to the amounts billed, The total amount of the VAT to recover is ThCh$ 2,345,054, has been already fully recovered.

Until today it is only pending that the Trustee submit its final account and proceed to the final distribution of funds totaling approximately US $ 640.000.- to be distributed among all creditors in bankruptcy.

NOTE 18 - POST-EMPLOYMENT AND OTHER BENEFIT OBLIGATIONS

18.1 Detail of account

Post-employment and other benefit obligations	September 30, 2016 ThCh$	December 31, 2015 ThCh$

Total current and non-current obligations for post-employment benefits	**4,634,026**	**4,972,249**

18.2 Detail of post-employment and other similar obligations

As of September 30, 2016 and December 31, 2015, this account is detailed as follows:

Post-employment and other benefits obligations	Staff severance indemnity	
	September 30, 2016 ThCh$	December 31, 2015 ThCh$
Present value of defined benefit plan obligations opening balance	4,972,249	4,976,539
Current service cost of defined benefit plan obligations	354,812	513,183
Liquidations obligation defined benefit plan	(693,035)	(517,473)
Present value of defined benefit obligations ending balance	**4,634,026**	**4,972,249**

NOTE 18 - POST-EMPLOYMENT AND OTHER BENEFIT OBLIGATIONS (CONTINUED)

18.3 Balance of post-employment and other similar obligations

	Staff severance indemnity	
	September 30, 2016 ThCh$	December 31, 2015 ThCh$
Present value of defined benefit obligations, ending balance	**4,634,026**	**4,972,249**
Present obligation with defined benefit plan funds	4,634,026	4,972,249
Fair value of defined benefit plan assets, ending balance	-	-
Balance of defined benefit obligations, ending balance	**4,634,026**	**4,972,249**

18.4 Expenses recognized in income statement

	Staff severance indemnity		Income statement line item where recognized
	January 1, 2016 to September 30, 2016 ThCh$	January 1, 2015 to September 30, 2015 ThCh$	
Current service cost of defined benefit plan	379,999	361,653	Cost of sales Administrative and sales expenses
Interest cost of defined benefit plan	172,456	197,729	Cost of sales Administrative and sales expenses
Total expense recognized in income statement	**552,455**	**559,382**	

18.5 Actuarial hypothesis

Detail	September 30, 2016 ThCh$	December 31, 2015 ThCh$
Discount rate used	1.95%	1.95%
Inflation rate	4.6%	4.6%
Future salary increase	2.0%	2.0%
Mortality table	B-2006	B-2006
Disability table	PDT1985-Category II	
Rotation table	ESA-77	

Assumptions for future mortality rates are based on actuarial data obtained using published statistics and historical experience.

NOTE 18 - POST-EMPLOYMENT AND OTHER BENEFIT OBLIGATIONS (CONTINUED)

18.6 Sensitivity analysis

The following chart shows the sensitivity analysis of the significant hypotheses as of September 30, 2016:

Nivel of Sensitivity	Discount rate used		Inflation rate		Future salary increase	
	Increase 1% (ThCh$)	Decrease 1% (ThCh$)	Increase 1% (ThCh$)	Decrease 1% (ThCh$)	Increase 1% (ThCh$)	Decrease 1% (ThCh$)
Impact on current and non-current of employment benefit obligation	(334,435)	375,809	16,816	(2,025)	708,978	(350,130)

To evaluate impact, the sensitivity analysis has been determined based on the extrapolation method obtaining reasonable results in terms of the changes in the significant hypotheses used as of June 30, 2016.

In the following table the payments of expected of employment benefit obligation are presented:

	September 30, 2016 ThCh$	December 31, 2015 ThCh$
During the upcoming 12 month	132,552	582,924
Between 2 to 5 years	848,627	882,178
Between 5 to 10 years	1,173,502	1,667,921
More than 10 years	2,479,345	1,839,226
Total Payments Expected	**4,634,026**	**4,972,249**

NOTE 19 - EQUITY

19.1 Subscribed and paid capital

As of September 30, 2016 and December 31, 2015 authorized, subscribed and paid share capital amounts to ThCh$ 776,355,048.

19.2 Number of subscribed and paid shares

	Number of shares subscribed	Number of shares paid	Number of shares with voting rights
Sole series	1,000,000	1,000,000	1,000,000

No shares have been issued or redeemed in the years covered by these financial statements.

On January 22, 2014, the extraordinary shareholders meeting was celebrated, where a capital reduction was approved since the amount of $ 857,944,547,865 divided into 1,000,000 ordinary shares, without par value the amount of $ 776,355,047,865 divided into 1,000,000 ordinary shares held, no par value, therefore the decrease was M $ 81,589,500.

NOTE 19 - EQUITY (CONTINUED)

19.3 Dividends

On April 28, 2015, the Company's Board of Directors met in an Ordinary Meeting, where they agreed to distribute a final dividend with debit to 2014 income, in the amount of Ch$24,845,230,291. As of September 30, 2015, this dividend has been paid in full.

On May 13, 2015, the Ordinary Shareholders meeting of the Company was celebrated, where they agreed to distribute a provisional dividend with debit to 2015 income, in the amount of Ch$16,355,000,000. As of September 30, 2015, this dividend has been paid in full.

On August 12, 2015, the Ordinary Shareholders meeting of the Company was celebrated, where they agreed to distribute a provisional dividend with debit to 2015 income, in the amount of Ch$18,167,000,000. As of December 31, 2015, this dividend has been paid in full.

On November 16, 2015, the Ordinary Shareholders meeting of the Company was celebrated, where they agreed to distribute a provisional dividend with debit to 2015 income, in the amount of Ch$28,799,000,000. As of December 31, 2015, this dividend has been paid in full.

On April 26, 2016, the Ordinary Shareholders meeting of the Company was celebrated, where they agreed to distribute a final dividend with debit to 2015 income, in the amount of Ch$19,668,084,516 which will be paid as of May 25, 2016, to the shareholders listed in the respective registry as of May 18, 2016. . As of September 30, 2016, this dividend has been paid in full.

On May 18, 2016, the Ordinary Shareholders meeting of the Company was celebrated, where they agreed to distribute a provisional dividend with debit to 2016 income, in the amount of Ch$17,189,000,000 which will be paid as of June 26, 2016, to the shareholders listed in the respective registry as of June 10, 2016. As of September 30, 2016, this dividend has been paid in full.

On August 17, 2016, the Ordinary Shareholders meeting of the Company was celebrated, where they agreed to distribute a provisional dividend with debit to 2016 income, in the amount of Ch$21,842,000,000 which will be paid as of September 21, 2016, to the shareholders listed in the respective registry as of September 14, 2016. As of September 30, 2016, this dividend has been paid in full.

19.4 Other reserves

Other reserves as of September 30, 2016 and December 31, 2015 are detailed as follows:

Description	**September 30, 2016 ThCh$**	**December 31, 2015 ThCh$**
Net investment hedge	5,228,175	6,432,354
Cash flow hedge (Exchange rate)	(9,524,444)	(13,363,615)
Actuarial calculation exchange differences	(431,169)	(431,169)
Deferred taxes	1,276,408	1,987,856
Total	**(3,451,030)**	**(5,374,574)**

Translation adjustment	(1.204.180)	3,839,172	-	**2,634,992**
Deferred tax	325,129	(1,036,577)	-	**(711,448)**
Closing balance as of June 30, 2016	**3,816,567**	**(6,952,843)**	**(314,754)**	**(3,451,030)**

19.5 Capital management

Capital management refers to the Company's administration of its equity,

The capital management policy of Transelec S.A. and subsidiary is aimed at maintaining adequate capitalization levels to sustain operations and provide sensible leverage, thus optimizing shareholder returns and maintaining a solid financial position.

Capital requirements are determined based on the Company's financing needs, taking care to maintain an adequate level of liquidity and complying with financial covenants established in current debt contracts, The Company manages its capital structure and makes adjustments based on prevailing economic conditions in order to mitigate risks from adverse market conditions and take advantage of any opportunities that may arise to improve its liquidity position.

The principal financial covenants established in current debt contracts related to capital requirements are:

1) Maintain individual and indebtedness levels (Total debt / Total capitalization ratio) no greater than 0.7 based on the definitions of these terms in the respective prospectuses of local bond series C, D, H, K, M, N and Q.
2) a) Maintain minimum individual and equity of fifteen million UF equivalents to ThCh$393,365 as of September 30, 2016. As that term is defined in the respective prospectuses of local bond series C, D, H, K, M and N.

   b) Maintain during period of validity the issue of bonds a minimum equity of M$350.000.000, such as it is defined in the prospectus of local bond Series Q.

The test of distribution of restricted payments (net cash flow of the operations / financial costs) must be greater than 1.5 times, as those terms are defined in the respective prospectuses C,D,H,K,M and N.

The following tables present – as of September 30, 2016 and December 31, 2015 - the calculation of the two covenants mentioned above and also a calculation of a third ratio that the Company has to comply, which does not depend on capital (equity) amount.

NOTE 19 - EQUITY (CONTINUED)

19.5 Capital management (continued)

Covenant 1	Total debt / Total capitalization ratio Lower or equal to 0.70	September 30, 2016 ThCh$	December 31, 2015 ThCh$

NOTE 22 - INCOME TAX RESULT (CONTINUED)

Reconciliation of Tax Expense Using Statutory Rate with Tax Expense

The following table reconciles income taxes resulting from applying statutory tax rate to the "Profit Before Taxes" to the income tax expense recorded in the income statement for the periods 2016 and 2015:

Using Effective Rate	September 30, 2016 ThCh$	September 30, 2015 ThCh$
Tax expense at statutory rate	(20,500,056)	(17,288,796)
Price level restatement of equity	1,175,559	1,811,214
Fusion tax increase value PP&E Trans am	-	6,907,747
Change in income tax rate, Tax Reform Law 20,780	(2,436,994)	(1,740,611)
Other differences increase (decrease)	1,127,991	71,665
Total adjustments to tax expense using statutory rate	**(133,444)**	**7,050,015**
Tax Expense at effective Rate	(20,633,500)	(10,238,781)

	September 30, 2016 ThCh$	September 30, 2015 ThCh$
Statutory Tax Rate	24.00%	22.50%
Price level restatement of equity	(1.38%)	(2.36%)
Increase of the tax basis of PP&E due to Transam merger	-	(8.99%)
Change in income tax rate, Tax Reform Law 20.780	2.85%	2.27%
Other differences increase (decrease)	(1.31%)	(0.10%)
Adjustments to Statutory Tax Rate, Total	**0.16%**	**(9.18%)**
Effective Tax Rate	**24.16%**	**13.32%**

The tax rate used for the periods 2016 and 2015 reconciliations corresponds to 24% and 22.5%, a corporate tax rate that entities should pay on taxable profits based on current tax regulations.

Tax Reform Chile

On September 29, 2014, the law N° 20,780 was published, named “Tax Reform which modifies the Tax System on the income and which introduces various adjustments on the Tax System.”

Among the principal changes, the creation of two optional tax systems stand out: The Attributed Income System, which establishes the progressive increase of the tax rate of the first category for the commercial years 2014, 2015, 2016 and 2017 increasing to 21%, 22.5%, 24%, 25%, respectively; and in the partially integrated system, which establishes a progressive increase of the tax rate of the first category for the commercial years 2014, 2015, 2016, 2017 and 2018 increasing to 21%, 22.5%, 24%, 25.5% and 27% respectively.

NOTE 23 - EARNINGS PER SHARE

Basic earnings per share is calculated by dividing profit attributable to the Company's shareholders by the weighted average number of common shares in circulation during the year excluding, if any, common shares purchased by the Company and maintained as treasury shares.

Basic Earnings per Share	September 30, 2016	September 30, 2015
Profit attributable to equity holders of parent (ThCh$)	64,783,399	66,600,312
Earnings available to common shareholders, basic (ThCh$)	64,783,399	66,600,312
Total basic shares	1,000,000	1,000,000
Basic earnings per share (Ch$)	64,783	66,600

There are no transactions or concepts that create a dilutive effect.

NOTE 24 - SEGMENT REPORTING

The Company engage exclusively in providing services related to electricity transmission. To provide such services, they possess assets throughout the country that form the Transelec transmission system, stretching 3,168 kilometers from the Arica y Parinacota Region to the Los Lagos Region.

Electricity transmission service falls under the legal framework that governs the electricity sector in Chile. This framework defines transmission systems and classifies transmission facilities into three categories (the trunk transmission system, the subtransmission system and additional systems), establishing an open access scheme for the first two systems and allowing additional lines that use rights of way and have national assets for public use along their paths to be used by third parties under non-discriminatory technical and economic conditions. The law also sets criteria and procedures for determining compensation that transmission facility owners are entitled to receive.

Transelec's revenue from the trunk system consists of the "annual transmission value per segment" (VATT for its Spanish acronym), which is calculated every 4 years based on the "annual investment value" (AVI for its Spanish acronym), plus "operating, maintenance and administrative costs" (COMA for its Spanish acronym) for each trunk system segment.

The annual subtransmission system value (VASTX for its Spanish acronym) is calculated every four years. It is based on the valuation of facilities that are economically adapted to demand and consists of standard investment, maintenance, operating and administrative costs, plus average energy and capacity losses of the adapted facilities.

Revenue from additional systems is established in private contracts with third parties, which are principally generators and users that are not subject to price regulation. The main objective of the additional systems is to enable generators to inject their production into the electricity system and to allow large customers to make withdrawals.

The law distinguishes between the different systems in order to ensure that tariffs are appropriate for each case, Nevertheless, facilities of a given voltage (220 KV, for example) are identical, whether trunk, subtransmission or additional, Thus, a 220 KV facility requires a given type of maintenance, fundamentally because of its geographic location, its proximity to the ocean, the climate, etc., but in no case does this maintenance depend on whether that 220 KV facility is trunk, subtransmission or additional. Precisely the same happens with operating costs: operations are executed by the corresponding CDEC regardless of whether that 220 KV facility is trunk, subtransmission or additional, Thus, for Transelec this classification into trunk, subtransmission or additional systems is merely for tariff purposes and has no other cons equences.

NOTE 24 - SEGMENT REPORTING (CONTINUED)

The Company's management analyzes its business as a set of transmission assets that enables it to provide services to its customers. As a result, resource allocation and performance measurements are analyzed in aggregate.

Internal management takes into account this classification criterion for revenue and costs merely for descriptive purposes but in no case for business segmentation.

As a result, for the purposes of applying IFRS 8, all of the businesses described above are defined as one sole operating segment for Transelec S.A.

Information about products and services

	September 30, 2016 ThCh$	September 30, 2015 ThCh$
Revenues from regulated transmission services	110,932,625	165,421,103
Revenues from contractual transmission services and others	103,672,904	39,411,402
Total revenues	**214,605,529**	**204,832,505**

Information about sales and principal customers

The Company has three customers that individually represent more than 10% of total revenues for the nine - month ended on September 30, 2016. The amounts of revenues recognized from these customers were: ThCh$100,228,679, ThCh$35,957,396, ThCh$36,052,266, respectively. For the nine -month periods ended September 30, 2015 the Company had three customers that individually exceeded 10% of total revenues. The amounts of revenues recognized from these customers were: ThCh$ 91,549,364, ThCh$32,586,416 y ThCh$40,556,626, respectively.

NOTE 25 - THIRD-PARTY GUARANTEES, OTHER CONTINGENT ASSETS AND LIABILITIES AND OTHER COMMITMENTS

As of September 30, 2016, the Company has received performance guarantees from contractors and third parties, primarily to guarantee performance of construction and maintenance works, amounting to ThCh$34,783,474 (ThCh$18,634,565 as of December 31, 2015). In addition, in order to guarantee repayment of housing loans, mortgages have been constituted in favor of the Company.

NOTE 26 - DISTRIBUTION OF PERSONNEL

As of September 30, 2016 and December31, 2015, personnel employed by Transelec S.A. are detailed as follows:

	September 30, 2016				
	Manager and Executives	Professionals and technical personnel	Other employees	Total	Average of the year
Total	15	359	130	504	496,3

NOTE 26 - DISTRIBUTION OF PERSONNEL (CONTINUED)

	December 31, 2015				
	Manager and Executives	Professionals and technical personnel	Other employees	Total	Average of the year
Total	15	346	130	491	480.4

NOTE 29 - SUBSEQUENT EVENTS

Between September 30, 2016, closing date of these Interim Financial Statements and the date of issuance, there have been no significant financial and accounting events that may affect the equity of the Company or the interpretation of these Interim Financial Statements.

Management Discussion and Analysis (MD&A) of the Financial Statements

TRANSELEC S.A.

Santiago, Chile
September 30, 2016

SUMMARY

As of September 30, 2016, the Revenues reached MCh$214,606, showing an increase of 4.8% compared to the same period of 2015 (MCh$204,833). The increase of Revenues in 2016 are mainly explained by an agreements renegotiation with Endesa, new projects and macroeconomic effects associated to exchange rate.

During the first nine months of 2016, Transelec S.A. obtained an EBITDA* of MCh$185,179, a 2.8% higher than the comparison period of 2015 (MCh$180,107), with an EBITDA Margin** of 86.3% (87.9% in 2015). The EBITDA increase is mainly due to higher Revenues of MCh$9,773 partially offset by an increase of MCh$2,654 of Fixed Expenses associated with Administration and lower Other Income by MCh$1,655.

Net Income recorded by the Company as of September 30, 2016 was MCh$64,784, which is 2.7% lower respect to the comparison period, and represents a decrease of MCh$1,817. This decrease is mainly explained by higher Income Tax of MCh$10,394 partially offset by higher Operating Income for MCh$9,203.

The loss in Non-Operating Income as of September 30, 2016 was MCh$56,162, representing an increase of 1.1% compared to the same period of 2015 (MCh$55,536), mainly explained by higher Financial Costs of MCh$4,269 and lower Other Income of MCh$1,655. This is partly offset by lower losses for indexed assets and liabilities, which mostly measures the inflation impact on the UF denominated debt of the Company of MCh$3,698 and higher Financial Income of MCh$1,658.The profits on foreign exchange differences stays practically in line with same period of 2015, decreasing in MCh$57.

During the period of nine months ended on September 30 of 2016, the company incorporated US$75 million of new facilities, related to the commissioning of eight trunk upgrade projects and also to a transmission assets acquisition from Enel Green Power.

*EBITDA= Operating Revenues + Operating Fixed Costs + Administration and Sales Fixed Costs + Other Income + Finance Leases Amortization
**EBITDA Margin= EBITDA/Revenues

Relevant events of the period:

- On March the company started the documentation for September, 2016 bond refinancing in the local or international market.
- On April 4, the company extended Banco Estado Promissory Note for 3 months with new maturity on July 3, 2016.
- The Annual Shareholders Meeting was held on April, 26.
- The Banco Estado Promissory Note was paid at its maturity on July, 4.
- New Transmission Bill of Law was approved on July, 11.
- Transelec issued a bond on July, 12 in the international market for US$350 million at 12.5 years with a 3.875% interest coupon rate.
- During August and September, Transelec signed Swap agreements for US$350 million to hedge the new debt.
- The C Series Local Bond was paid at its maturity on September, 1.
- In 2016, Transelec S.A. paid to their shareholders the following amounts:
    - MCh$19,668 as 2015's final dividend distributed on May 25, 2016.
    - MCh$17,189 as the 2016 first interim dividend distributed on June 16, 2016.
    - MCh$21,842 as the 2016 second interim dividend distributed on September 21, 2016.

Transelec S.A. has prepared its financial statements as of September 30, 2016 according to International Financial Reporting Standards (IFRS), and taking into account the instructions and standards of financial reporting issued by the SVS, in particular Circular No. 856 (10/17/2014) which instructs a form of registration of differed taxes for audited companies by this Superintendency. Note 2.1 of the Financial Statements, from which this MD&A is part, accounts and describes this instruction. The figures in this MD&A are expressed in millions of Chilean pesos (MCh$), since Chilean Peso corresponds to the functional currency of Transelec S.A.

1. INCOME STATEMENT ANALYSIS

*EBITDA= Operating Revenues + Operating Fixed Costs + Administration and Sales Fixed Costs + Other Income + Finance Leases Amortization
**EBITDA Margin= EBITDA/Revenues

a) Operating Income

During the period of nine months ended on September 30, 2016, Revenues reached MCh$214,606 increasing by 4.8% over the same period of 2015 (MCh$204,833). This increase is mainly explained by higher income from Toll Sales, which as of September 30, 2016 reached MCh$210,485, a 4.9% higher than that obtained in the same period of 2015 (MCh$200,707). A portion of Services Revenues has been reclassified accounting wise changing the results presented in 2015. Considering this reclassification, Services Revenues reached MCh$4,121 as of September 30, 2016, a 0.1% lower than 2015 (MCh$4,126).

The increase in Toll Sales is explained by MCh$6,606 higher income associated with the National segment (previous Trunk) and an increase of MCh$6,463 in the Dedicated segment (previous Transmission Solutions), partially offset by MCh$3,292 of lower revenues of in the Zonal segment (previous Subtransmission).

Higher revenues from National segment are mainly explained by the commissioning of new projects by MCh$6,187, an agreement renegotiation with Endesa in 2016 for MCh$6,023, higher revenues due to the reclassification of transmission lines from Zonal and Dedicated segments to the National by MCh$4,617 and macroeconomic effects associated to a higher exchange rate of MCh$2,498, partially offset by lower tariff revenues by MCh$8,974, an agreement renegotiation with Endesa in 2015, with revenues of MCh$2,346 in that period and the maturity of transmission agreements that become regulated by MCh$1,348. The higher income from Dedicated segment are associated mainly due to the agreement renegotiation with Endesa in 2016 for MCh$4,391, the commissioning of new projects by MCh$1,540 and macroeconomic factors mainly due to a higher exchange rate producing an increase of MCh$1,418 and, partially offset by MCh$1,734 lower revenues associated with transmission lines reassigned to the National system. The lower revenues in Zonal segment are mainly associated to lower income by MCh$2,884 due to the reclassification of transmission lines to the National segment and a decrease of MCh$1,443 mainly explained by lower demand in the period, this was partially offset in MCh$720 due to the an agreement renegotiation with Endesa in 2016.

Total Transelec Costs and Expenses (Cost of Sales + Administrative Expenses) on September 30, 2016 were MCh$73,027 increasing by 0.8% when comparing the same period of 2015 which totaled MCh$72,457. Costs and Expenses presented an account reclassification affecting the exposed in 2015. Total costs are composed by the following main items.

Cost of sales during the analysis period totaled MCh$57,382, 3.6% lower than the same period of 2015 (MCh$59,537). These costs are mainly maintenance and operation of facilities and they are split in 65.8% depreciation of fixed assets (68.1% in September 2015), and 34.2% fixed costs involving personnel costs, supplies and contracted services (31.9% in 2015). In September 2016, fixed costs increased by MCh$592, an amount 3.1% higher than the one registered in September 2015, while depreciation was 6.8% lower. The increase of fixed costs is mainly explained by payment associated with collective bargaining with one of the unions and higher costs of the regulator (CDEC). The decrease in depreciation is mainly due to asset retirement due to thefts.

Administrative expenses amounted to MCh$15,645 in September 2016, 21.1% higher than those obtained in the same period in 2015 (MCh$12,920). These expenses are comprised 89.6% by fixed costs that include personnel costs and works, supplies and contracted services (88.0% in 2015) and depreciation 10.4% (12.0% in 2015). In September 2016, the Fixed Expenses increased by MCh$2,654, an amount 23.3% higher than obtained in September 2015, the increase in fixed expenses is mainly due to payment of a performance bond for the project Nogales – Polpaico and payment of collective bargaining with one of the unions.

b) Non-Operating Income

The Non-Operating Income for the first nine months of 2016 was a loss of MCh$56,162, an 1.1% higher than the same period of 2015 (MCh$55,536), mainly explained by higher Financial Costs and a drop in Other Income partly offset by lower Other Losses for Indexed Assets and Liabilities and higher Financial Income.

Financial Costs recorded as of September 2016 amounted MCh$48,267, a 9.7% higher than the same period of 2015 (MCh$43.998). This increase is mainly explained by the new bond issuance before the maturity of Series C Bond which causes higher temporary debt (about two months). Specifically, the main items that explained higher Financial Costs are, accrued interest for the new dollar debt issuance and the effect of a 6.4% depreciation of the Chilean peso (average exchange rate between periods), which implies higher interest paid on dollar bonds by MCh$2,952, the Swap agreements to hedge the new bond by MCh$795 and the effect of the UF variation of 4.4% average which generated higher interest paid on UF bonds by MCh$732.

Gains by Other Income as of September, 2016 were MCh$3,521, a 32.0% lower than the same period of 2015 (MCh$5,176). The difference is mainly explained by higher exceptional income in 2015 due to reassessments and fines in favor to Transelec, partly offset incomes in 2016 due to adjustments associated with the merge of Transelec Norte and the fire insurance due to the accident occurred in Pan de Azúcar Substation.

Foreign Exchange Differences as of September, 2016 reached MM$768, decreasing 7.0% to those obtained in the same period of 2015 (MCh$825). This is mainly explained by negative difference between periods from Cross Currency Swap of MCh$53,604 and dollar accounts receivables from related companies for MCh$37,827 almost totally offset by the positive impact of lower exchange rate on the Senior Notes bonds, with a positive difference of MCh$92,072 between periods.

Losses for Indexed Assets and Liabilities were MCh$19,317 on September, 2016, a 16.1% lower than the same period of 2015 (MCh$23,015). This is explained by the readjustment of local bonds in Unidad de Fomento (UF) due to variation in the UF. On the period of nine months ended on September 30 of 2016 this variation corresponds to 2.32% compared with a 2.92% for the same period of 2015, due to higher inflation in that period.

Financial Income as of September 2016 amounted MCh$7,134, a 30.3% higher than the same period of 2015 (MCh$5,476), this is mainly explained by higher accrued interest to related companies for MCh$1,349 associated to a higher amount of intercompany loan to Transelec Holding Rentas Ltda. in 2016.

c) Income tax

The Income Tax as of September 30, 2016 increased by 101.5% compared to the same period of 2015. This increase is mainly explained because in 2015 the merge of Transam and its subsidiaries and then the merge of Transam in Transelec caused a deferred tax income that reduced the Income Tax expense in that period. The increase in Income Tax is also due to the 11.2% higher profits before taxes and the increase in tax rate that, for 2015, was 22.5% as opposed to 2016 where it is 24.0%, as established in 2014 tax reform.

2. BALANCE SHEET ANALYSIS

ITEMS	September 2016 MCh$	December 2015 MCh$	Variation 2016/2015 MCh$	Variation 2016/2015 %
Current assets	122,023	92,078	29,945	32.5%
Non-current assets	2,179,176	2,157,149	22,027	1.0%
Total Assets	**2,301,199**	**2,249,227**	**51,972**	**2.3%**
Current liabilities	63,515	257,921	-194,406	-75.4%
Non current liabilities	1,439,028	1,200,658	238,370	19.9%
Equity	798,656	790,649	8,007	1.0%
Total Liabilities & Equity	**2,301,199**	**2,249,227**	**51,972**	**2.3%**

The increase in Assets between December 2015 and September 2016 is explained by an increase in Current Assets and Non-Current Assets. The increase in Current Assets is due to a higher balance in short term accounts receivable from related parties and higher cash and cash equivalent, partially offset by lower trades and other receivables and lower current tax assets. The increase in Non-Current assets is mainly explained by an increase in property, plant and equipment and an increase in other non-financial assets, partially offset by lower other financial assets and lower long term accounts receivable from related parties.

The increase in Total Liabilities and Equity as of September 30, 2016 is due to an increase Non-Current Liabilities and Equity partially offset by lower Current Liabilities. The increase in Non-Current Liabilities is almost totally explained by an increase of long term other financial liabilities due to the new bond issuance in July, 2016. The increase in Equity was due to higher retained earnings. Lower Current Liabilities are explained by a decrease of short term financial liabilities due to the maturity Local C Bond in September, 2016.

Value of the Main Pp&E in Operation

ASSETS	September 2016 MCh$	December 2015 MCh$	Variation 2016/2015 MCh$	Variation 2016/2015 %

Revolving Credit Facility**	USD	2.10%	Floating	15-Oct-17	-	-
Local Promissory Note***	CLP	3.80%	Fixed	03-Jul-16	-	16,000.0

*Series C bond was paid at maturity.
**US$ 250 million Revolving Credit Facility: The floating rate of 2.10% breaks down in 3 months Libor rate plus a margin of 1.25%. At September 30, 2016, the Company did not utilize this line therefore does not pay interest of 2.10% and currently is paying a fixed commission of 0.4375% per annum of the committed amount undrawn.
***Local Promissory Note was paid at maturity.

Although increases in inflation may have an impact on the costs of debt denominated in UF and therefore on the Company's finance expenses, these impacts are slightly lessened by accounts receivable denominated in UF.

3. CASH FLOWS ANALYSIS

ITEMS	September 2016 MM$	September 2015 MM$	Variation 2016/2015 MM$	Variation 2016/2015 %
Cash flows provided by (used in) operating activities	132,994	126,077	6,917	5.5%
Cash flows provided by (used in) investing activities	-113,922	-103,916	-10,006	-9.6%
Cash flows provided by (used in) financing activities	-5,297	-55,753	50,456	90.5%
Net increase (decrease) of cash and cash equivalent	**13,775**	**-33,592**	**47,367**	**N/A**
Cash and cash equivalent at the begining of the period	24,157	65,913	-41,756	-63.4%
Cash and cash equivalent at the end of the period	**37,932**	**32,321**	**5,611**	**17.4%**

As of September 30, 2016, cash flows provided by operating activities reached MCh$132,994, which represents an increase of 5.5% over the same period of 2015 (MCh$126,077), mainly explained by lower payments to suppliers by MCh$13,893 partly offset lower cash receipts for sales for MCh$48,204.

During the same period, cash flow used in investing activities reached MCh$113,922, a 9.6% higher than in the same period of 2015 (MCh$103,916), mainly explained by higher cash flow used in purchases of property, plant and equipment that reached MCh$35,948 and higher cash flow used in loans to related parties by MCh$20,332, partially offset by higher receivables from related parties for MCh$48,204.

During the period of nine months ended on September 30, 2016, the cash flows used in financing activities amounted MCh$5,297, a 90.5% lower than the used in the same period of 2015 (MCh$55,753). This is mainly explained by the new bond issuance which represent an increase of MCh$210,979 related to September, 2015, partly offset by the C Series bond payment for MCh$160,126.

In addition, the Company has secured the following fully available committed credit line to ensure funds are immediately available to cover working capital needs:

Bank	Amount (up to)	Maturity	Type of Credit
Scotiabank, Bank of Tokyo-Mitsubishi, DnB NOR,Citibank, JP Morgan Chase Bank and Export Development Canadá	US$250,000,000	15-Oct-17	Working Capital

5. THE MARKET

Transelec S.A. develops its activities in Chile in the electricity market, which has been divided into three sectors: generation, transmission and distribution. The generation sector includes companies that are dedicated to produce electricity that will subsequently be used throughout the country by end users. The purpose of the distribution sector is to carry electricity to the physical location where each end user will use this electricity. Finally, the primary goal of the transmission sector (the only sector in which it participates Transelec S.A.) is to transport the generated electricity from where it is produced (electrical power plants) to the 'points of entry' of the distribution companies' networks or of the large end users.

Transelec's business mainly focuses on tolls by use the capacity of its facilities to transport and transform electricity, in accordance with established safety and quality standards. The transmission system of Transelec S.A. and its subsidiary, which stretches between 'Arica y Parinacota' Regions to 'Los Lagos' Region, encompasses the majority of the national transmission lines and substations in the Central Interconnected System (SIC) and the Great North Interconnected System (SING). This transmission system transports the electricity that supplies approximately 98.5% of Chile's population. The Company owns the 81% of all of the 500 kV electricity transport lines, 42% of the 220 kV lines, 86% of the 154 kV lines and 10% of the 110kV and 66kV lines.

The legal framework that governs the electrical transmission business in Chile is contained in DFL No. 4/2006, which establishes the modified, coordinated and systemized text of Decree with Force of Law No. 1 from the Ministry of Mining, issued in 1982; and the General Electricity Services Law. (DFL No. 1/82) and its subsequent modifications, including Law 19,940 ('Ley Corta I') published on March 13, 2004, Law 20,018 ('Ley Corta II') published on May 19, 2005, Law 20,257 (Generation with Non-Conventional Renewable Energy Resources) published on April 1, 2008, Law 20,701 (Procedure to grant Electrical Concessions) published on October 14, 2013, Law 20,698 (Contribute with the Generation mix expansion through Non-Conventional Renewable Energy) published on October 22, 2013, the Law 20,726 (that promote the interconnection of independents electrical systems) published on February 7, 2014 and Law N° 20.805 (Refines Bidding System of Power Supply for customers subject to price regulation), published on January 29, 2015. Recently, on July 20, 2016 the Law 20,936 was published, it stablishes a new electric transmission Company and creates an independent coordinator of the national electricity system. These standards are complemented by the Regulations of the General Electricity Services Law of 1997 (Supreme Decree No. 327/97 from the Ministry of Mining) and its respective modifications, the Regulations that establish the Structure, Functioning and Financing of Load Dispatch Centers (Supreme Decree No. 291/2007), the Regulations of Complementary Services in 2012 (Supreme Decree No. 130, Ministry of Energy) and also the Technical Standard on Reliability and Service Quality (Exempt Ministerial Resolution No. 40 of May 16, 2005) and its subsequent modifications.

The new Law 20,936 amends the General Law of Electrical Services in electric transmission and creates an independent coordinator of the National Electric System. In matters of power transmission, the bill of law redefines transmission systems classifying them into five segments: National Transmission System (now trunk), the Transmission Systems Zonal (currently subtransmission) Systems Dedicated (currently additional transmission), Systems for Development Poles and International Systems Interconnection, addresses the transmission planning a long-term horizon. Regulates the pricing of national, zonal and for development poles systems and payment for use of transmission facilities dedicated by users liable to price regulation. Prices are determined by the Commission every four years through processes that include the participation of companies, users and interested institutions and the Panel of Experts in the event of any discrepancies.

Pricing recognizes the efficient acquisition and installation costs according to market prices, which are annualized considering the assets life determined every three tariff periods and whit a variable discount rate. The owners of regulated transmission facilities must receive the Annual Transmission Value from the sum of the real tariff revenues and a single charge associated to each segment and applied directly to end users.

The Law 20,936 establishes a new payment regime for using national facilities that would become effective as of January 1, 2019 starting on that date and a transitory period that will extend until December 31, 2034, period during which the payments of the generating companies for the associated use to the supply agreements for free and regulated customers, concluded prior to the publication of enactment of this new law, will apply the same general rules for calculating the payment of the trunk transmission with some adjustments. These resulting injections tolls will be reduced year by year and the payment of the corresponding amounts will be transferred to the demand.

On February 3, 2016, a decree from the Ministry of Energy was published, and set trunk transmission facilities and the new Investment Value (VI), the Annuity of the Investment Value (AVI), the Operation, Maintenance and Administration Costs (COMA) and the Annual Transmission Value per Segment (VATT) for trunk facilities for the period from January 1, 2016 to December 31, 2019, as well as the indexation formulas applicable during that period. The determination of trunk facilities and their Annual Transmission Value (VATT) is updated every four years using an internationally-tendered study.

During 2014 and 2015 were developed the third trunk facilities tariff process in order to determinate the tariffs and indexation formulas corresponding to the period 2016 - 2019, that were fixed by Decree N° 23T by the Minister of Energy on February 3, 2016 and its application is retroactive from January 1, 2016.

On April 9, 2013, the Supreme Decree No. 14 was published by the Ministry of Energy, setting subtransmission tariffs from January 2011 to December 2014. The difference between invoiced amounts using these provisional tariffs since January 2011 until the publishing date of this decree were reassessed by the CDEC based on the difference between the provisional tariff and the definitive values established by Decree No. 14. According to what is indicated in the transitory third article of Law 20,805 published on January 29, 2015, and to what is established in the Decree No. 7T of April 22, 2015, the validity of the Decree No. 121/2010, which fixes the tariffs of subtransmission facilities, and of the Exempt Decree No. 14/2013, which fixes the qualification of subtransmission facilities, is extended until December 31, 2015.

In accordance with the provisions of the eleventh transitory article of Law 20,936, during the period between the January 1, 2016 and December 31, 2017, remain in force Decree No. 14 and subtransmission tariffs in it are fixing, excluding payment corresponding to the generating companies. These payments will not be covered or absorbed by the subtransmission users. The Ministry of Energy shall issue a decree to may make adjustments to the Decree No. 14 (Decree No. 14 adjusted) to implement the exemption from power plants and for harmonious and consistent implementation of Decree No. 14 with the application decree 23T. This decree No. 14 adjusted has not yet been issued and subtransmission revenues that have been collected since is 1 January 2016 shall be reassess under the provisions containing the decree.

The Subtransmission Systems Studies that were set the basis for determining the tariffs and indexation formulas corresponding to the period 2016 - 2018 were finished during December 2014. In accordance with the twelfth article of the law 20,936, during the duration of the extended term of the decree No.14, it will continuity and term given to the process of setting new subtransmission tariffs which will be effective from January 1, 2018 until December 31, 2019.

6. MARKET RISK FACTORS

Due to the nature of the electrical market and the legislation and standards that regulate this sector, the Company is not exposed to significant risks in developing its principal business. However, the following risk factors should be mentioned and considered:

6.1. Regulatory Framework

Electricity transmission tariffs are set by law and are indexed in order to guarantee real annual returns for the operator. The nature of the industry enables transmission income to be stable over time. In addition, this income is complemented with income obtained from private contracts with large clients.

However, the fact that these tariffs are revised every four years in National and Zonal Transmission Studies, could place the Company at risk of new tariffs that are detrimental or less attractive given the investments it has made.

Since the National, Zonal and Development poles Transmissions Systems are subject to the regime of unrestricted open access, as provided by the law that regulates our industry, there is a risk that the authority attempt to extend this access not only to the network connection - connecting a bay to a busbar of a substation - but also a physical access to the transmission facilities, meaning to force the transmitter, owner of such facilities, to share assets or areas inside some substations. The same may happen with additional systems that are subject to the open access regime when these facilities have available technical capacity.

The law 20,936 considers the promulgation of several regulations, which are in development and publication is expected in the second half of 2017. For the preparation of regulations the authority has seen the participation of agents of the sector through workshops and before the publication these should be subject to public consultation.

6.2. Operating Risks

Although the Company's management believes it has adequate risk coverage, in line with industry practices, it cannot guarantee the sufficiency of its insurance policy coverage for certain operating risks to which it is exposed, including forces of nature, damages to transmission facilities, on-the-job accidents and equipment failure. Any of these events could negatively affect the Company's financial statements.

6.3. Application of regulations and/or Environmental Law

The operations of Transelec are subject to Law No. 19.300, on Chilean general basis of the environment ('Environmental Law'), enacted in 1994 and modified through the Law No. 20.417 published in the Official Gazette on January 26, 2010. This modification considered an institutional change, creating new institutions with environmental competencies: (i) the Ministry of Environmental Affairs; (ii) the Minister Council for Sustainability; (iii) the Environmental Assessment Service; and (iv) the Superintendence of Environmental Affairs; these institutions are in charge of the regulation, evaluation and inspection of the activities that are likely to generate environmental impacts. Afterwards, the Law No. 20.600 was published on June 28, 2012, creating the Environmental Courts, whose function is to resolve environmental disputes within its jurisdiction. This institutional specialization generates a scenario of greater control and supervision in the Company's actions.

The Environmental Impact Assessment System (SEIA) Bylaw, modified through the Supreme Decree No. 40/2012, has introduced changes in the assessment process of the projects, implying the adaption of the formulation of these projects to the new scenario, mainly regarding the level of details in its description, analysis of alternatives and the impacts assessment.

While the new regulation SEIA has been applied to investment projects of the company, in April 2015 by Decree No. 20 from the Ministry of Environment, the President of the Republic created the Presidential Advisory Commission to evaluate the Environmental Impact Assessment System to have proposals aimed at solving the major structural aspects of the system that contribute to the operation of this environmental management tool. The Final Report of the Presidential Commission for the Evaluation of SEIA was delivered in July 2016, 25 measures aimed at strengthening and improving the SEIA through legal, policy and procedural changes are proposed. However, the Ministry of Environment to date has not established any priority on modifications to be introduce in Law 19,300 and Decree 40/2012.

The enactment of the Supreme Decree No. 66/2013 of the Minister of Social Development, which regulates the indigenous consultation procedure for the Chilean State and the participation and consultation indigenous procedure considered in the Supreme Decree No. 40/2012 for the investment projects in the Environmental Impact Assessment System, has generated indigenous consulting processes of relative effectiveness, implying delays in the management of some projects and even the prosecution of some environmental authorizations. However, during the past few months there has been a relative decline in the prosecution of the environmental licenses.

On the other hand, investment projects in Chile are facing a more informed and organized citizenry, therefore, the challenge is to formulate projects that include people's concerns and proposals of the community through participatory and informational processes a in an early stage pre environmental project processing. The risk of not considering the citizenry in this early stage, results in a greater complexity scenario regarding the environmental approval and the prosecution of environmental licenses.

6.4. Delays in the Construction of New Transmission Facilities

The success of the program for extending the trunk transmission network and building new facilities will depend on numerous factors, including cost and availability of funding. Although Transelec has experience with large-scale construction projects, the construction of new facilities could be negatively affected by factors commonly associated with such projects including delays in obtaining regulatory authorizations, scarcity of equipment, materials or labor, etc. Any of these factors could cause delays in the partial or total completion of the capital investment program, and could increase the costs of the projects.

6.5. Technological Changes

Transelec is compensated for investments that makes in electrical transmission facilities through an annual valuation of the existing facilities (AVI), which is performed every four years using current market prices. Any significant technological advance in the equipment that are part of Transelec' facilities could lower this valuation, which would prevent partial recovery of the investments made.

6.6. Foreign Exchange Risk

The following factors expose Transelec to foreign exchange risk (since Chilean peso is the functional currency):

- Transelec carries out several types of transactions in U.S. dollars (construction contracts, import purchases, etc.).
- Maintains accounts receivables in UF and US dollars.
- Maintains Cross Currency Swap contracts that compensates the risks of exchange rates on the international issuances, amounting to a notional amount equivalent to US$375 million in 2014 and a US$350 million in 2016.
- Maintains lease contracts that generate income indexed to US dollars.

Exchange rate exposure is managed using a policy that involves fully hedging the Company's net balance sheet exposure using diverse instruments such as foreign exchange forward contracts and cross currency swaps.

The following table details the amounts of monetary assets and liabilities denominated into dollar and Chilean pesos in the periods indicated below:

	September 2016		December 2015	
In million pesos	**Assets**	**Liabilities**	**Assets**	**Liabilities**
Dollar (amounts associated with balance sheet items)	646,007	646,400	499,757	482,980
Dollar (amounts associated with income statement items)	-	-	-	-
Chilean peso	1,655,080	1,654,687	1,711,623	1,728,400

EXCHANGE RATES (Observed exchange rates)

MONTH	Average 2016 ($)	Last Day 2016 ($)	Average 2015 ($)	Last Day 2015 ($)
January	721.95	710.37	620.91	632.03
February	704.08	694.17	623.62	618.76
March	682.07	669.80	628.50	626.58
April	669.93	659.34	614.73	611.28
May	681.87	689.81	607.60	616.66
June	681.07	661.37	629.99	639.04
July	657.57	656.95	650.14	671.11
August	658.89	678.57	688.12	695.25
September	668.63	658.02	691.73	698.72
Average of the period	**680.67**	**675.38**	**639.48**	**645.49**

Semiannual Indexation formulas included into toll contracts and subtransmission tariffs as well as the monthly Indexation formulas for regulated trunk revenues, allow to reflect changes in the value of the facilities and operating, maintenance and administration costs. In general, those indexation formulas contemplate variations in international prices of equipment, supply prices and domestic labor.

6.7. Credit Risk

Credit risk corresponding to receivables from commercial activities, is historically very low due to the nature of the business of the Company's clients and the short term of collection of receivables from clients, which explain the fact of not having significant accumulated amounts.

As of September 30, 2016, the company has five main clients which represent individually between 3.1% and 46.7% of the total revenues. These are Endesa Group (MCh$10,229), AES Gener Group (MCh$36,052), Colbún Group (MCh$35,957), Engie Group (ex E-CL) (MCh$10,044) and Pacific Hydro-LH-LC Group (MCh$6,736). The total revenues recognized for these clients represent an 88.1% of the total revenues of the company. In the period of comparison, the company had the same structure of clients which revenues reached to MCh$91,549, MCh$40,557, MCh$32,586, MCh$7,294 and MCh$5,060 respectively, with a percentage of the total incomes of 86.4%.

The toll agreements signed with these clients, including its subsidiaries, will generate a large part of the Company's future cash flows and, therefore, a substantial change in their assets, financial condition and/or operating income could negatively affect the Company.

In terms of the Company's credit risk associated with financial assets (time deposits, fixed-return mutual funds and sell-back agreements), its treasury policy establishes certain limits on a particular institution's exposure; such limits depend on the risk rating and capital of each institution. Likewise, for investments in mutual funds, only funds with a risk rating qualify.

6.8. Liquidity Risk

Liquidity risk is the risk of the Company not satisfying a need for cash or debt payment upon maturity. Liquidity risk also includes the risk of not being able to liquidate assets in a timely manner at a reasonable price.

a) Risk associated to Company's Management

In order to guarantee that Transelec is able to quickly react financially to investment opportunities and pay its obligations by their maturity dates, in addition to its cash balances and short-term receivables, the Company has committed line of credit for working capital of US$250 million, equivalent to MCh$164,505. As of the balance sheet date, does not register balance of used amounts. This committed line of credit was contracted on July 9, 2012, is granted for a period of three years by a bank syndicate consisting of Scotiabank, Bank of Tokyo-Mitsubishi and DnB NOR. Additionally, this line was renegotiated and extended on October 15, 2014 until October 15, 2017. This time, the bank syndicate was formed by the following banks: Scotiabank, Bank of Tokyo-Mitsubishi, DnB NOR, Citibank, JP Morgan Chase Bank and Export Development Canada. In that renovation, has been improved:

- the costs not committed (Commitment Fee) from 0.6% to 0.4375%,
- the margin or spread for use from 2.35% to 1.25% by withdrawn amount and
- other restrictions clauses that resulted more favorable to Transelec.

The Company is exposed to risks associated with indebtedness, including refinancing risk when its debt matures. These risks are mitigated by using long-term debt and appropriately structuring maturities over time.

The following table presents the capital amortizations corresponding to the Company's financial liabilities, according to their maturity date, as of September 30, 2016 and December 31, 2015.

Debt Maturity (capital and interests) MCh$	0 to 1 year	1 to 3 years	3 to 5 years	5 to 10 years	More than 10 years	Total
June 30, 2016	58,905	117,809	117,809	695,566	1,139,338	2,129,426
December 31, 2015	226,265	101,691	101,691	708,219	884,187	2,022,053

b) Associated risk to the settlement of trunk transmission system tariff revenues

According to Decree N°4/20.018 from the Ministry of Economy, Fomentation and Reconstruction, in its articles 81, 101, 104 and 106, and complementary rules, Transelec has the right to perceive on a provisory basis the real tariff income (IT for its name in Spanish) of the trunk transmission system generated for every period.

In order to get their own revenues set up in the first paragraph of article N°101 of the above mentioned Decree N°4/20.018, the real tariff income perceived on a provisory basis must be settled by Transelec according to the repayment schedule prepared by the respective CDEC (Center of Economic Dispatch of Charge) through the collection or payment to the different companies, owners of generation facilities.

Transelec could face the risk of not timely collecting the IT that some of the companies owners of generation facilities should pay as determined in the energy balances prepared by CDEC, what may temporarily affect the Company's liquidity position. In this sense, and in the opinion of the Company, the "clearing house" function that Transelec fulfils in the above-mentioned collection process, consists not of the collection of amounts for its own benefit, but it is merely collection and subsequent transfers to third parties of credits and debts that belong to the generating companies, with the exception of the expected IT.

6.9. Interest Rate Risks

Significant changes in fair values and future cash flows of financial instruments that can be directly attributable to interest rate risks include changes in the net proceeds from financial instruments whose cash flows are determined in reference to floating interest rates and changes in the value of financial instruments with fixed cash flows.

The Company's assets are primarily fixed and long-lived intangible assets. Consequently, financial liabilities that are used to finance such assets consist primarily of long-term liabilities at fixed rates. This debt is recorded in the balance sheet at amortized cost.

The objective of interest rate risk management is to achieve a balanced debt structure, decrease the impact on costs due to interest rate variations and, reduce volatility in the income statement.

All the debt as of September 30, 2016, and as of December 31, 2015, was at a fixed rate. However, in the case of UF indexed debt, variations in inflation rates could potentially impact the Company's financial expenses.

UF Values

MONTH	Average 2016 ($)	Last Day 2016 ($)	Average 2015 ($)	Last Day 2015 ($)
January	25,629.09	25,629.09	24,601.14	24,557.15
February	25,661.05	25,717.40	24,538.61	24,545.23

Average of the period	**25,933.12**	**25,965.06**	**24,847.68**	**24,888.37**

CONSOLIDATED MATERIAL FACTS

TRANSELEC S.A.

1) On March 10, 2016 and according the article 9 and second paragraph of article 10 of the law No 18,045 of Securities Market, the following material fact was reported:

Transelec S.A.'s Board of Directors at its meeting held on March 9, 2016, agreed on informing as a material fact the calling for the annual Shareholders Meeting to be held on April 26, 2016, in order to inform and request approval from shareholders on the following matters:

1. Annual Report, General Balance Sheet, Financial Statements and External Auditors' Report, corresponding to the period ended on December 31, 2015.

2. Distribution of final dividends. On this matter, Transelec S.A.'s Board of directors agreed on requesting approval to the shareholders for the distribution of a final dividend for fiscal year 2015, for a total amount of $19.668.084.516, to be paid on the terms and conditions to be agreed by them.

3. Appointment of the Board of Directors members.

4. Remuneration of the Board of Directors and the Audit Committee.

5. Appointment of External Auditors.

6. Newspaper to call for Shareholders Meetings.

7. Resolutions adopted by the Board regarding matters contained in articles 146 et seq. of the Law on Stock Corporations.

8. Other matters of interest for the Company and of the Shareholders' competence.

2) On April 14, 2016 and according the article 9 and second paragraph of article 10 of the law No 18,045 of Securities Market, the following material fact was reported:

That on April 13, 2016, the Company held a special shareholders meeting, and the following was agreed:

1. Ratify the resolutions adopted by the Board of Directors of the Company at its Session No. 138, pursuant to Article Twenty-Eighth of the Bylaws, in the sense of authorizing the issuance of debt for up to USD$ 700,000,000 by issuing bonds in the international market, in the national market or both.

2. Ratify the special powers of attorney granted by the Board of the Company for the preparation and execution of acts and contracts necessary for this purpose.

3) On April 27, 2016, and according the article 9 and second paragraph of article 10 of the Law No 18,045 of Securities Market, the following material fact was reported:

That on April 26, 2016, the Company's annual shareholders meeting was held, and the following was agreed:

1. Approval of the Annual Report, Balance Sheet, Financial Statements and Report of the External Auditors for the period ended December 31, 2015.

2. Approval of the distribution of a final dividend for the year 2015, for the amount of $19.668.084.516, which will be paid starting from May 25, 2016 to shareholders registered in the respective registry on May 18, 2015 (the Form No 1 about dividend distribution regarding circular 660 was attached in an upcoming essential fact on the same date).

3. It was agreed to renew the members of the Board, which Will be composed as follows: Richard Legault as director titular and Benjamin Vaughn as his alternate; Paul Dufresne as director and Patrick Charbonneau as his alternate; Brenda Eaton as director and Jerry Divoky as her alternate; Alfredo Ergas Segal as director and Etienne Middletonas as his alternate; Bruno Philippi Irarrázabal as director and José Ignacio Concha Vialas his alternate; Mario Valcarce Durán as director titular and Patricio Leyton Flores as his alternate; Blas Tomic Errázuriz as director and Rodrigo Ferrada Celis as his alternate; José Ramón Valente Vias as director and Stella Muñoz Schiattino as his alternate; and, Alejandro Jadresic Marinovic as director and Valeria Ruz Hernández as his alternate.

4. Set the remuneration of the Board and the Audit Committee.

5. Approval of the appointment of Ernst & Young as external auditors of the company for the year 2016.

6. Approval of the appointment of the Diario Financiero to publish the citations for the shareholders meetings.

7. It was informed of the resolutions adopted by the Board on matters contained in Articles 146 and following of the Corporations Law.

4) On May 19, 2016, and according to the article 9 and second paragraph of article 10 of the law No 18,045 of Securities Market, and the Circular No 660 of the Superintendence of Securities and Insurance, the following material fact was reported:

   That, Transelec S.A.'s Board of Directors at its Meeting held on May 18, 2015, approved the distribution of the interim dividend of CLP $17.189.000.000 corresponding to year 2016, to be paid from June 16, 2016 to the shareholders registered at the pertinent registrar at June 10, 2016.

   The Form No 1 about dividend distribution was attached to the circular.

5) On July 8, 2016, and according the article 9 and second paragraph of article 10 of the Law No 18,045 of Securities Market, and General Norms N° 30 and 210 of the SVS, the following material fact was reported:

   That on July 7, 2016, Transelec S.A. placed bonds on international markets under Rule 144A Regulation S of the United States Securities Act of 1933, for US $350,000,000 dollars of the United States of America. The maturity date of the bonds is January 12, 2029 (12.5 years), and a nominal interest rate of 3.875% will be paid per annum.The effective placement rate was of 3,992%, with a spread over the treasury bonds of the United States of America of 2.60%. Interests will be paid semi-annually, and capital will be repaid in one installment at maturity. In the placement, J.P. Morgan Securities LLC, Scotia Capital (USA) Inc., Citigroup Global Markets Inc. and Santander Investment Securities Inc. acted as underwriters.

6) On July 25, 2016, and according the article 9 and second paragraph of article 10 of the Law No 18,045 of Securities Market, and General Norm N° 30 of the SVS, the following material fact was reported:

   That on July 22, 2016. Mr. Jerry Divoky announced his resignation as Alternate Director to the Chairman of the Board of Transelec S.A.

7) On August 18, 2016, and according to the article 9 and second paragraph of article 10 of the law No 18,045 of Securities Market, and the Circular No 660 of the Superintendence of Securities and Insurance, the following material fact was reported:

   That, Transelec S.A.'s Board of Directors at its Meeting held on August 17, 2016, approved the distribution of the interim dividend of CLP

$21.842.000.000corresponding to year 2016, to be paid from September 21, 2016 to the shareholders registered at the pertinent registrar at September 14, 2016.

The Form No 1 about dividend distribution was attached to the circular.
